<<< H40AA, TEMOTU ISLANDS >>>
<<< A NEW DXCC ENTITY >>>

The new DXCC criteria will become effective on 31 March 1998. The Temotu Islands, located in the South Pacific, collectively form the easternmost province of the Solomon Islands, an independent country since 1978. Because Temotu is separated by more than 350 km from the rest of the Solomon Islands, it should easily qualify as a new DXCC entity. The South China Sea DX Team (SCSDXT) has teamed with the Solomon Islands' IARU member organization, SIRS (Solomon Islands Radio Society), in organizing a full-scale DXpedition to Temotu, as well as preparing the application for new DXCC status.

Team members H44GP, H44GR, JA5DQH, N4GN, N7NG, OH0XX, OH1RY, OH2BC, OH2BE, OH2BH, OH2TA, W6OSP and 9V1YC will begin arriving on 21 March and may be found on the air using their individual H44 call signs (QSL via their respective home calls) while making final preparations for the main event. These early operations, which will include all-band activity in the CQ WW WPX SSB Contest (27-28 March) - will count for DXCC credit as the Solomon Islands, under the current rules.

At 23.59 UTC on 31 March, the team will starting operating as H40AA (please note that the Solomon telecommunications authorities have agreed to assign the previously unused H40 prefix to Temotu for all future amateur operations). At this point QSOs will count for Temotu DXCC credit, presuming the application for new DXCC status is eventually approved.

The H40AA operation will continue for approximately two weeks on the following frequencies: 1.824, 3.504, 7.004, 10.104, 14.024, 18.074, 21.024, 24.894, 28.024 and 50.104 MHz CW; 1.824, 3.775, 7.045, 14.195, 18.135, 21.295, 24.945, 28.495 and 50.104 MHz SSB; 14.083 and 21.083 MHz RTTY. Internet log search capability is likely to be made available a few weeks AFTER the operation. QSL H40AA via OH2BN either direct (Jarmo J. Jaakola, Kiilletie 5C30, Helsinki 00710, Finland) or through the OH bureau. <TNX N4GN>
