AN INTERVIEW WITH W9WNV ---> "We are all powered by dreams of distant lands, rare DX, and the urge to compete and stand up at the podium. Those dreams are often inspired by those whom we admire and want to be on par with - or even more.

Don Miller, W9WNV, was once a DX hero and a CQWW Contest SOAB dual record holder (CW/SSB) but suddenly left the industry. On DXpeditions, Don was eagerly followed by most of the DXing world. Martti, OH2BH wanted to emulate his efforts and become of his kind. What did Don do to create this following?

It was Christmas 2016 when Don Miller, W9WNV, and Martti Laine, OH2BH, Gathered at Martti's Finland home at his 70th anniversary party. This meeting brought back reminiscences of the days when our industry was still young and provided an interesting playing field for the evolution of our great DX passion.

During this meeting in Finland, Don was caught on video talking about his

earlier operations and his operating methods. Many aspects of how we operate now were pioneered by Don Miller. Split operation, "5NN," pileup management techniques; looking back, many of these techniques were first implemented during Miller's operations". Don talks about some of these issues in a YouTube video (5 parts): go to <https://www.youtube.com/> and search for 'W9WNV in Helsinki'. [TNX OH2BH]

PDXG QSL MANAGEMENT PLATFORM ---> Members of the Perseverance DX Group (PDXG) are collaborating with M0URX and M0OX0 to design and develop a cloud based QSL Management Platform aimed at simplifying the QSL manager's job. "The complexities of handling tens of thousands of QSL cards, e-mails, Not in Log/busted calls requests, returned postal mail pieces and a host of other tasks which were done manually for so many years needed to change". The project began in September 2014 and now the system is fully operational: see <http://www.pdxg.net/> for a summary of information. [TNX K5GS]

RSGB COMMONWEALTH CONTEST ---> The 80th edition of the Commonwealth (BERU) Contest (<https://berucontest.wordpress.com>) will be held on 11-12 March, from 10 UTC to 10 UTC, on 80, 40, 20, 15 and 10 metres CW. Only operators located within the United Kingdom and Crown Dependencies, Commonwealth or British Mandated Territories are eligible to enter.

RT9K/9 ---> After reaching Dikson Island (AS-005), the RT9K/9 team has had to abandon their plans for activation of other four IOTA groups in the Kara Sea (AS-054, AS-121, AS-104, AS-068), as ice conditions prevent them from going further. The Arctic "showed its severity and unpredictability", UA90BA says. Another attempt should take place next year.

YE0S ---> The 20-27 March peration from Sebira Island (OC-177) [425DXN 1341] has been cancelled.
