30 EUDXF AWARD --> Joining the celebrations for the 30th anniversary of the European DX Foundation are II3EUDX from Sardinia (QSL via IS0AGY) and LA30EUDXF from Norway (QSL via PA1AW). Information on the "30 EUDXF Award" for working these and other special callsigns: www.eudxf.eu/eudxf30-award/.

FRIENDS OF IOTA UPDATE ---> The Friends of IOTA appeal "has now reached GBP 17,360 on its way to our initial target of GBP 25,000 needed to bring to fruition the paperless QSLing project", Roger Balister (G3KMA) reported on the IOTA website on 23 October.

"We have to thank 182 contributors in 36 countries for their generosity. It is just a matter now of one more push to reach the target.

Enhancements to the existing IT in July have seen two thirds of new applicants using the Club Log paperless QSLing option for all or most credits claimed, and well over half of all submissions are using it to some degree. Overall some 36% of all credits claimed since early July are QSO matches.

This continues to make huge savings for applicants which will grow rapidly as we expand the list of activations in the paperless QSLing pool and bring online the complete IOTA rewrite late next Spring".

Donations are still gratefully received through PayPal to the email address islandsontheair@outlook.com (in the comments field add "Friends of IOTA" and your callsign to identify you). See www.rsgbiota.org for the complete report.

R3CA/# OQRS ---> The OQRS for R3CA/8, R3CA/9 and R3CA/0 is now available on Club Log: https://secure.clublog.org/logsearch/R3CA_8_9_0 (5,034 QSOs logged between 5 March and 10 May 2016 during "The Great Northern Route" Arctic expedition). The IOTA operations from eight different groups (AS-005, AS-038, AS-068, AS-070, AS-104, AS-152, AS-163 and AS-164) have been validated, and three islands have been added to the list: Begichevskaya Kosa (AS-068), Bera (AS-104) and Kolchak (AKA Rastorguyeva, AS-104). All direct and bureau QSL requests through OQRS will be processed by Victor, UA3AKO. All traditional direct QSL requests sent to Yuri, UA9OBA will be replied (do not duplicate your request via OQRS).

T31W CANCELLED ---> The Perseverance DX Group (www.t31w.com) was planning to spend 15 days on Kanton Island during October 2017 [425DXN 1320], but "with the recent activation of T31 by a small European team", the team announced on 24 October, the T31W DXpedition has been cancelled:

> "As you may recall, we announced our intention to activate T31, Most Wanted Number 16, in March, 2016. We began building the team, applied for a license, secured a boat capable of safely transporting 12 operators and submitted documentation for visas. Additionally, banking arrangements were made, a Limited Liability Company was formed, we opened the website and documents were submitted by the team members. In other words, significant time and effort were expended by the team, including an outlay of money.
>
> Seven months after we announced T31W a 3 man team from Europe activated T31 and made a total of 30,000 QSOs. Of the total, 5,000 QSOs were with Europe where T31 is one of the most needed entities. Subsequently, they announced their intention to return to T31 in 2017 to finish the job. Based on these events it makes no sense for us to commit personal or donated funds to continue the project.
>
> When the news of this recent T31 activation became public we considered switching to one of two back-up DXCC entities. One that we've been in discussions with the governing agencies for over 2 years, and another that recently came into view. These alternatives are still under consideration.
>
> We thank the DX community for their past support of our projects; donations made to T31W will be refunded over the next 30 days. Questions may be directed to info@t31w.com". [TNX K5GS]

TQSL 2.3 ---> A new version of TQSL (v2.3) is now available for install. The primary changes are additional local language translations and a rewrite of the callsign certificate request handling to eliminate the confusing signed/unsigned request questions. NOTE: there is a defect in the Windows version of TQSL 2.2.2 that when it offers to upgrade, prevents that upgrade from working correctly. If you encounter this, to update to TQSL 2.3 you need to manually download the update (http://www.arrl.org/tqsl-download) and then install it.

+ SILENT KEY + Dr. Lutz D. Schmadel, DK8UH passed away on 21 October. Born

in 1942, he was an astronomer whose special interest was the astrometry of minor planets. "Lutz's landmark contributions to science are numerous, and his scientific persona was greater than life", says Cezar, VE3LYC. "Throughout the years, he was also a very passionate radio amateur, who fell hard in love with the IOTA Programme. As a Board member of the German DX Foundation, Lutz was a staunch supporter of IOTA activities, and behind every single operation who received GDXF funding. The IOTA community lost an extremely passionate, fiercely supportive, and generous advocate".
