"If conditions are such that the band(s) are not open for RTTY, we most likely will give JT65/JT9 and FT8 a try". The lower bands (160-30m) are expected to "provide the best opportunity to work the world during the evening hours", while 17 and 20 metres will be "the most likely bands to work the world during the day". PIRATES ---> "For more than a year now an Amateur Radio operator has been pirating the following calls on CW", The Daily DX reported on 17 August. "It started off with VU2TS, but only on CW. Then he was switching between VU2TS and 4U1ITU, when the club was using 4U1WRC, again CW only. Next he began using 5H3PM, CW only. The pirate has now recently switched over to 5H3MG again CW only. I have confirmed with Tanzania Communications Regulatory Authority (TCRA) that both 5H3 calls are not currently registered calls. The signals are clearly coming from Southern Europe".

XF2L ---> The 19-20 August XF2L operation from Isla de Sacrificios (NA-224) [425DXN 1340] has been cancelled owing to bad weather conditions. The XF2L team was active from Isla de Lobos (NA-221) on 28 December 2016 and again on 29-31 May, from Isla de Sacrificios (NA-224) on 17-19 February, and from

Isla de Enmedio (NA-224) on 28-30 July. They will try and return to Isla de Lobos sometime in December. Logsearch on the Grupo Puebla DX's website: http://puebladx.org/spcall/XF2L_log.php; QSL direct to XE1SOV (or use PayPal: ricardoorozcoc[@]hotmail.com).
