>>> 3Y0Z: BOUVET ISLAND <<<

The 3Y0Z Team's original plan was to fly from Punta Arenas (Chile) to King George Island (South Shetlands), where they expected to board the M/V Betanzos and begin their voyage to Bouvet [425DXN 1392].

On 13 January, however, the team gathered in Punta Arenas stated that "heavy sea ice east and north of King George Island" would make navigation "slow and of increased risk. We will therefore depart from Punta Arenas and sail directly to Bouvet. This has necessitated changes to preparations". On 16 January the team reported that they were awaiting "final clearance to sail which will be issued by the Chilean Navy, the regulatory authority for maritime safety".

Eventually the M/V Betanzos set sail on 19 January around 12.30 UTC. The team will be active as 3G9A/mm (QSL via N200) during their voyage; the sailing time to Bouvet is estimated at 14 days. "Whatever delay we encounter will not impact our results on the island", the team says, and their QRT date will be extended as necessary.

FT8 OPERATING GUIDE ---> Gary, ZL2IFB has published his "FT8 Operating Guide", described as "a collection of pragmatic tips that takes over where the WSJT-X help and installation notes leave off". It is "specifically aimed at HF DXers": http://www.g4ifb.com/FT8_Hinson_tips_for_HF_DXers.pdf.

"It started out as my rough notes as I fumbled around with the new mode", he Says. "Those grew steadily over the past few months, absorbing information, advice and helpful hints from many sources including plenty of encouraging comments on the web version. I've peppered it with screen shots, quotes, comments and ideas, and given it a little structure. It's still not entirely 'finished' (partly because the operating techniques and software are still evolving) but I wanted to get it out there ahead of Bouvet, so those who intend to have a go at working 3Y0Z on FT8 have a chance to read and practice their skills, honing their techniques before the Main Event. Feedback welcome, especially corrections and further tips... such as how we are going to cope with 3Y0Z's extra wide splits, and wall-to-wall continuous callers".
