IREF TO CEASE OPERATION ---> The Island Radio Expedition Foundation (IREF), the only expedition funding organization specifically focused on IOTA expeditions, is ceasing operation. Formed in 1999 by AD5A, N5UR, AB5EB and NI5DX (SK) after their H75A expedition to NA-209, through its donors IREF has contributed more than 80,000 USD to IOTA expeditioners since its inception. "One of the primary reasons for ceasing operations", AD5A says, "is that the funding model for expeditions has changed. OQRS has given expeditioners a much easier tool for raising money than the traditional methods of the past. Accordingly, requests were down as were contributions. IREF is proud of its legacy, but times have changed and IREF's impact has been diminished over the past few years".

W8S ---> Operations from Swains Island began at 08.30 UTC on 7 October. With temperatures around 40 degrees Celsius and very high humidity, building the stations required a great deal of effort from the entire team. This is one of the reasons why the stations took a little longer to set up than hoped. The DXpedition will not be extended to compensate for the late start, and the team will leave the island sometime in the local morning (UTC afternoon) of 17 October. "The team is fully aware that not everything is going as expected and therefore the expectation cannot be fully met yet", the team posted on 10 October. "Despite the extreme conditions in which to work, the

ambition is as high as ever, and the team is doing everything possible to meet expectations". According to Club Log's latest statistics, at 03:48 UTC on 13 October W8S had made 57247 QSOs with 16028 unique callsigns:
