DXCC NEWS ---> The VU4RBI/VU4NRO QSL cards are being accepted for DXCC credit. The following clarification comes from Bill Moore, NC1L (DXCC Manager): "A few cards have been rejected on the basis of incomplete information on the cards. We apologize to Bharathi, NIAR, et.al. for any misunderstandings. If you received a QSL card complete with all data (time, date, band, mode and callsign), there is no problem. If you have a QSL card with less than complete data (callsign only, missing time/date, etc.) we will need to see the card at HQ. This is usual procedure. Blank cards and cards missing information are always subject to inspection at HQ. Do not add the missing information. As always we strive to maintain the highest integrity possible in the DXCC program. Ms. Prasad has graciously agreed to supply additional log information where necessary. If you have only an incomplete card, do not alter the card by filling in the missing information. Simply send us the card, and we will try to obtain the fill. If you expect a direct QSL, it would be easier on everyone involved if you would wait for the direct card".

HV5PUL ---> Station Manager Luca Della Giovampaola, IW0DJB should like to remind DXers that HV5PUL, the amateur radio station located at the Pontifical Lateran University, is still active and in good health. Cards should be sent to HV5PUL, c/o Pontificia Universita' Lateranense, Piazza San Giovanni in Laterano 4, 00120 Citta' del Vaticano.

NEW BOOK ---> "Who's Who in Amateur Radio?", published by the Radio Society of Great Britain, provides a listing of around 500 of the most active amateurs, including their name, callsign, place of residence, date of birth, profession, education, when they were first licensed, their amateur radio achievements, areas of amateur radio interest, and amateur radio club or society memberships. In nearly 50% of the cases the listing is accompanied by a photograph of the individual which will help to put a face to that well-known callsign. Entries are in alphabetical order by current callsign but included is an index by surname and appendices listing various key people in amateur radio, and in particular in the history of the Radio Society of Great Britain. Further details can be found at <http://www.rsgbshop.org/shop/acatalog/index.html>
