4W6A ---> Logs were uploaded to LoTW a few days after the end of the DXpedition and QSL cards have been ordered. As of 23 October, QSLs for over 11,000 QSOs have already been requested either direct or by OQRS. These requests have already been processed and the direct QSLs will be sent as soon as the cards are received from the printers. Bureau cards requested by OQRS will be sent out soon afterwards, with direct mailings to the major QSL bureaux of the world.

A report on the DXpedition with a few photos and videos can be found at www.m0urx.com, while 150 more photographs have been uploaded to the Gallery on www.4w6a.com. More videos taken by VK8DX and MW0JZE can be found on YouTube - search "4W6A" and look for the videos uploaded by "mw0jze". [TNX 9M6DXX]

EARTHQUAKE EMERGENCY ---> Radio Amateurs in Turkey remain active in the response to the earthquake that struck Van province on 23 October. Assistance has been given by TRAC in setting up VHF/UHF networks to relief agencies and some traffic is being carried on the 144 MHz band. The need for HF operations is reducing, however there is still a government station

which may operate on 7.092 MHz USB. Amateurs are still requested to be careful when operating between 7.092 and 7.095 MHz to avoid interference to ongoing relief operations. [TNX IARU Region 1]

IOTA EU-155 ---> The retention of EU-155 in IOTA list is in doubt. "The IOTA Manager was informed at Ham Radio 2011 Friedrichshafen that the two barrier islands listed as qualifying for EU-155, Baron and Scanno di Piallazza, no longer exist. Authoritative information has now been provided by a local operator to show this probably to be the case. It is worth noting that the Po Delta is a remarkably fragile natural environment with barrier reefs, as and when they occur, subject to change by tide and storm. IOTA rules require that, in the absence of qualifying islands, the group concerned should be suppressed. One final check will be made on the latest satellite pictures expected shortly following which a decision will be taken and a notice issued. In the meantime, no new operations claiming to take place from EU-155 will be regarded as qualifying for credit". [TNX Roger Balister, G3KMA, RSGB IOTA Manager]
