>>> DUCIE ISLAND 2001 <<<

Ducie Island (24.40.00S - 124.47.00W, OC-182, WAZ 32, ITU 63) should be the next new Entity to be added to the DXCC List [425DXN 545]. The main part of the team (JA1BK, JF1IST, JA1SLS, K9AJ, K5VT and F03BM) expects to leave Mangareva (Gambier Islands, French Polynesia) on 13 November in the local evening, to stop at Pitcairn and pick up other two operators (team leader Tom, VP6TC, and Dave, VP6DB) and then to sail immediately for Ducie. They will be active with four stations and a VP6 callsign to be announced when the operation starts, i.e. at 00.00 UTC on 16 November. The team must be back on Mangareva on 28 November.

The two main frequencies - 21020 kHz (CW) and 21295 kHz (SSB) - will be used 24 hours a day. Other prime frequencies include 28495 kHz and 14195 kHz for SSB and 14020 kHz for CW, but some activity is planned to take place on the other bands (160-6 metres) and on RTTY as well. It is expected that low band and WARC operations are more likely to take place in the last days of the operation, as the initial emphasis will be to allow as many operators as possible to work this rare IOTA and probable new DXCC Entity.

The team will have 2-element beams for 10 and 15 metres, a 4 Square for 20 metres and wire and vertical antennas for the other bands. There will be a 6 meter beacon on 50.110 Mhz. 160 metres are not a priority. Nevertheless, the team is taking an inverted L 160 antenna and if the weather and other factors cooperate there may be 160m operation nearer the end.

The pilot station is Bill Avery, K6GNX. QSL via VE3HO (HF QSOs: Garth Hamilton, P.O. Box 1156, Fonthill, Ontario L0S 1E0, Canada) and JA1BK (6m QSOs: Kan Mizoguchi, 5-3 Sakuragaoka 4 Chome, Tama-City, Tokyo 206-0013, Japan). Logs will be available at <http://www.big.or.jp/~ham/dx.html>. [TNX K6GNX and The Daily DX]
