MY DX SUMMIT LAUNCHED ---> The newfangled My DX Summit (MDXS) [425DXN 1226] opened for public on 21 November at 10.00 UTC. MDXS introduces a fresh lineup of features with a handy propagation tool: predicted propagation is based on your personal location, and by clicking a DX spot you will see the current conditions and a 24-hour window covering all bands from your station, short and long path, to a distant DX location. This recent face-lift makes several new functions readily available, assuring a pleasant user experience. Mobile users are also extensively supported which makes MDXS the first-ever mobile-ready DX Cluster. Join the launch festivities by sending a maximum number of spots during the first 14 days; three (3) winners will be visited by Santa Claus bringing his certificate from the OHo-Ho-Ho land of Radio Arcala, OH8X. My DX Summit has automatically replaced the old DX Summit at www.dxsummit.fi. [TNX OH2BN]

Please make your insurance QSO only if you think the QSO was bad". The email address for log checks is vu4kv_log@yahoo.com, but be advised that they "will look at these emails only after the expedition is finished and the team has got back home".
