SIX METERS IN SPAIN -> Salvador EA3BKZ/EH3BKZ, reports that currently there are about 140 stations in Spain authorized to operate on 50 MHz. The rules allow to use the frequencies between 50.000 and 50.200 Mhz, only in CW/SSB, with a power less than 30 watt. The Spanish stations change their prefix working on 6 mtrs, from EA to EH.

NEW POSTAL RATES IN USA (CORRECTION) -> Following what published in previous number, some English versions of the bulletin report a wrong equivalence between ounces and grammes. One ounce is equivalent to 28.35 grammes. Sorry for the mistake.
