The recent operation from Scarborough Reef has been approved for DXCC credit. Quite a number of QSOs (1380, most of them on 30m) did not make it into the initial on-line log. The problem has been fixed and the log now contains 45,820 QSOs from 13.48 UTC on 29 April through 23.54 UTC on 5 May (<http://www.scarboroughreef.com/srlog.html>) with 17,884 unique callsigns. The new band/mode breakdowns are as follows:

Band	SSB	CW	RTTY	TOTAL

160m	0	54	0	54
80m	121	217	0	338
40m	509	3039	0	3548
30m	0	4226	0	4226
20m	10391	11435	54	21880
17m	3325	3744	0	7069
15m	4011	1985	268	6264
12m	402	474	0	876
10m	841	724	0	1565
	19600	25898	322	45820

The continental breakdowns are: Asia 21112, Europe 16329, North America 6918, Oceania 948, South America 301, Africa 212. Several statistic tables can be found at <http://www.scarboroughreef.com/srstats.html>, and photo galleries are available on the expedition's web site as well as on <http://picasaweb.google.com/paul.pescitelli/K4UJScarboroughReef>

As for the cards, please refrain from e-mailing inquiries to the the QSL manager (KU9C), as he is not in a position to answer whether you are in or not in the log at the moment. "If you are not in the web log", he says, "don't give up, put down EVERY QSO you believe you had, and I'll do the rest. If the web log shows 20 SSB, put down EVERY qso you think you had on 20 SSB, not just the first". In case of busted calls, Steve will use "well-established judgement in issuing the card, and may ask you to help confirm that the person whose call appears did not make a QSO". Finally, "if you DO NOT HAVE ANY detail besides what is in the web log online, it's impossible for me to give you credit for the card - I'm not in a position to issue a QSL to you 'just because' the web log says you're there. Not the way it works".

ANTARCTIC CHALLENGE ---> Gil, F5NOD reports that the Antarctic Challenge scores are up-to-date at <http://f6kdf.ath.cx/f5nod/index.htm>

HELP KADEK ---> Island chasers and hams throughout the world have been saddened by the news of Kadek's (YB9BU) material losses following the fire that destroyed his house in early April. "Help Kadek" initiative represents our way to show a friend that we care and that we do appreciate his long time dedication to the IOTA community. We hope that our support will help Kadek rebuild his radio shack and bring him back on the air. Please visit our web page at <http://www.mdxc.org/yb9bu> to find more about this initiative and to contribute to this fund through one of the regional collection points.

MONTENEGRO ---> Quoting a spokesman from the ITU Radiocommunication Sector, The Daily DX reports that the 400-409 callsign prefix block has been allocated to Montenegro. Serbia will continue to use YT0-YT9 and YU0-YU9, while the 4N and YZ prefixes have been withdrawn and given back to the ITU for future use to another nation.

QSL MANAGER OFFERED ---> Petr, OK1DOT (Petr.Gustab@seznam.cz) is willing to offer his services to a station in need. He can provide QSL cards at no charge to the stations he manages. Information on his QSLling policy can be found at <http://www.qrz.com/ok1dot> [TNX OK1DOT]

QSL XT2SE & 5V7SE ---> Elvira, IV2FSG will attend this year's Ham Radio event at Friedrichshafen and will be able to confirm contacts made during her

activities from Togo and Burkina Faso. Look for her at the Croatian booth on 22-23 May (14.00-16.00) and on 24 May (10.00-12.00). [TNX IK3GES]
