Then, on 16 August, he added that «in a very interesting development, the Myanmar radio licencing office contacted me and advised that they would issue a permit for me to operate on all HF amateur bands except 60m, and also allow 6m operation». He expects to move to Yangon «in the next week or so», but he anticipates that «it will still take a few months I guess before I am on the air» as «paperwork moves slowly».

3Y0J: LATEST NEWS • The team «is currently staging all our 3,5 tons of equipment at Oslo airport in Norway, where we within the next few weeks will do final checks and pack all equipment», Ken, LA7GIA posted to Facebook on 19 August.

«Container shipping is scheduled for mid-September. Next weekend several team members from Norway and US will gather and go through all checklists to make sure all small items are in correct place.

We have detailed out the logistic plan, and have made a few changes. Among the improvements is that we have bought yet another outboard engine enabling us to use 2 zodiac boats simultaneously during beach landing to speed up the unloading of gear. In addition we have a third spare zodiac + engine.

We have also swapped the Yanmar generators with some 5 kW QRO lightweight generators that will enable us to run full station setup with only two out of four diesel gens. We have also added some 2000 litres of versatile, robust and hardwearing IBC diesel tanks in various sizes. One of the requirements from Norwegian Polar Institute is that there must be absolutely no spillage of diesel. Each IBC tank will be placed in a tray and guyed to withstand the strong Bouvet wind».

The fundraising campaign has now reached the 90% of its target amount of donations and \$70,000 are still needed: see <https://www.3y0j.no/funding>. As part of their fundraising effort, the 3Y0J team has launched an online raffle with some great prizes. The raffle is exclusively for North America and European DXers due to the shipping of prizes. See the details on <https://www.3y0j.no/raffle>. The deadline is 25 September at 12 UTC. The online store with the official 3Y0J merchandise (T-shirts, coffee mugs, etc) can be found at <https://www.bonfire.com/store/bouvet-dxpedition-2023/>.

K7K • Most QSOs made by the recent K7K IOTA DXpedition to Kiska Island (NA-070) have been uploaded to Club Log, and the OQRS has been enabled for direct and bureau cards (<https://clublog.org/logsearch/K7K/2022>). Apparently a few hundred QSOs are still missing, though. No logs were lost, but «some laptops are in transit from Alaska and will not show up for 3-4 weeks», N3QQ says. Please refrain from sending log check requests until the complete log is uploaded around 15 September. Those who do not use Club Log's OQRS should send their cards direct only to N7RO.
