"Recent 'circumstances' in P5 during the last several months have made this Project even more challenging, for obvious reasons", he says, "Yet a new alternative route to potential success has also materialized, and I decided to unleash the full 'long term' plan, which has been to activate ALL of the four P5 IOTA Designators (AS-195, AS-196, AS-197 and AS-198)".

Over the past 18 months, Rick has been part of a discussion group (N7NG, G3SXW, ON4UN, ON4WW, W6SJ, ST2AR/S53R and others all with considerable DXpedition and/or DX QTH operating experience) and spent "considerable time in analyzing and discussing the observed cause and effect relationship between the operating 'styles' (and errors) of many major DXpedition operators, which always result in the same predictable anti-social behaviors and chaos occurring in all pileups". Rick plans to produce a web viewable video soon, "summarizing my perspective of the reality of things, which will also be the basis for any P5 operations and Pileup Management". Read the full release at www.k6vva.com/p5/p5infoupdates.html
