BANDS ALIVE: THE 2021 CW/SSB ULTRA-MARATHON ---> The True Blue DXers Club announces "Bands Alive", a year-long "ultra-marathon" to be run from 1 January through 31 December 2021. "As the new solar cycle is now under way and conditions on the HF bands are expected to gradually improve throughout 2021, this unprecedented initiative is launched to give DXers a further motivation to get on the air and therefore support, improve and promote amateur activity using person-to-person modes of communication such as CW and SSB. This initiative, which we call 'ultra-marathon' for a reason, is indeed unprecedented - its aim, reflected in its format, is to get people on the air and make as many unique contacts as possible over the duration of a full year, and not simply to work as many countries as possible". Participation is open to all amateurs: you do not need to sign up for TBDXC membership, but you have to register for the marathon on the dedicated section of the TBDXC website: <https://www.tbdxc.net/marathon>.

GYPO ---> K5G, K6G, K7G, K8P, N0G, N2G, N3G, N4G, N5G, N9G and W3G are special event stations expected to participate in the third annual "Get Your Park ON!" operating event on 10-18 October. Sponsored by the US affiliate of World Wide Flora and Fauna, GYPO is open to amateur radio operators around the world. A complete list of the special event stations will be provided at the start of GYPO, see <https://wwffkff.wordpress.com/>.

JX0X 2021 ---> The final decision to go to Jan Mayen (<http://jx0x.com/>) will be taken in a couple of weeks' time. "This decision will depend heavily on

if we think we have enough support from the individual DXers", the team says. "We depend on upfront support to sign the vessel contract", and donations are needed NOW. "We have been working on this project since April 2019, we have invested much time in planning and preparing this trip with all the permits and negotiations - and we feel we're so close. If you support us you will of course receive a QSL card and express LoTW as part of the donation. In addition we guarantee a 100% refund of all donations if we decide to cancel the trip". JX0X will focus on 160-30 metres CW and digital, with vertical antennas close to saltwater, and an excellent take-off for North America and Japan. They will also have beams for 20-10 metres. PayPal donations can be sent to [jx0x\[@\]la7gia.com](mailto:jx0x[@]la7gia.com).

WSJT-X 2.3.0-rc1 ---> Candidate releases are intended for beta testers: individuals interested in testing the programme's new features and providing feedback to the WSJT Development Team. The first candidate release for WSJT-X 2.3.0 introduces FST4 and FST4W, two new modes designed for use on the LF and MF bands. FST4 is optimized for two-way QSOs, while FST4W is for quasi-beacon transmissions of WSPR-style messages. Further details and operating hints can be found in the "Quick-Start Guide to FST4 and FST4W": https://physics.princeton.edu/pulsar/kljt/FST4_Quick_Start.pdf. Links to installation packages for Windows, Linux, and Macintosh are available on <http://physics.princeton.edu/pulsar/kljt/wsجتx.html>.
