3Y0J: LATEST NEWS ---> While the Bouvet 2022 team is "full speed ahead with the planning", the following information about what they are doing right now was posted to the 3Y0J's website (<https://www.3y0j.no/>) on 14 September.

1. We prepare for the first vessel deposit which is due next month.
2. The logistic team which Gjermund LB5GI is leading are working on several important topics:
 - a) preparing a safe way to land the operators and the equipment on Bouvet. A flexible system that allows for various conditions will be engineered, constructed and soon tested at a beach in Norway with enough swell. We are working on several different systems to adapt to the conditions. One system consist of two zodiacs, buoys, anchor, capstan and rope to safely land the dinghy with and without personnel/equipment. Gjermund and Rune LA7THA are working with some experienced Norwegian professionals within the maritime industry in Norway to test this system live.
 - b) prepare a winch system for lifting the equipment up from the beach to the cliff at Cape Fie. Again we prepare for a flexible system that can adapt to various shapes and height of the cliff; we will

use both electrical and non-electrical systems, and also manual systems. The bulkiest item is the diesel generators (75 kg). System to be engineered, constructed and tested in Norway soon. Effort is being led by Rune.

c) a system to assist us in bringing the equipment from the cliff up to the camp roughly 200 ft up at 70ft ASL being planned. This will help us when bringing 4.5 metric tons of equipment, fuel and water up to the camp.

3. We are currently reviewing the antenna layout once again, InnovAntenna being our main sponsor. We're working on a staged approach to allow setting up the camp also during very short weather windows with a setup that will be expanded with more stations and antennas until we reach the full setup. Adrian KO8SCA is currently preparing for testing the tribander yagi.
4. Erwann LB1QI is leading the ancillary systems and is working on the tent selection. Heated or not heated tents?
5. We are working on the station setup, but so far we have not selected the exact setup - we have several options on the table when it comes to radio and amplifiers.
6. Safety has a high attention in the project, and we will do what we can to avoid accidents and injuries. Bill KO7SS is taking the lead on Safety. Bill is dedicated to oversee all planning and operations with regard to safety. We will run risk workshops, discuss safety, safety procedures, mitigate risk, construct emergency shelter, prepare evacuation plan of personnel, evacuation of injured operator from camp to vessel, etc.

In a while we will start with Zoom meetings - there you can follow our journey to Bouvet. You can get the latest news, discuss with us topics, get feedback, interact with operators, Q&A and more. Check out our website for this feature (<https://www.3y0j.no/funding>): you can buy unlimited access to the meetings, and at the same time help us in fundraising.

QSL EL2DT ---> Fr. Joe Brown, EL2FM has been the long time QSL manager for Dickson, EL2DT, but "he was recently moved to a nursing home and is not answering emails", The Daily DX reports.
