3Y0J: LATEST NEWS ---> The team "is currently staging all our 3,5 tons of equipment at Oslo airport in Norway, where we within the next few weeks will do final checks and pack all equipment", Ken, LA7GIA posted to Facebook on 19 August.

"Container shipping is scheduled for mid-September. Next weekend several team members from Norway and US will gather and go through all checklists to make sure all small items are in correct place.

We have detailed out the logistic plan, and have made a few changes. Among the improvements is that we have bought yet another outboard engine enabling

us to use 2 zodiac boats simultaneously during beach landing to speed up the unloading of gear. In addition we have a 3rd spare zodiak + engine.

We have also swapped the Yanmar generators with some 5 kW QRO lightweight generators that will enable us to run full station setup with only 2 out of 4 diesel gens. We have also added some 2000 litres of versatile, robust and hardwearing IBC diesel tanks in various sizes. One of the requirements from Norwegian Polar Institute is that there must be absolutely no spillage of diesel. Each IBC tank will be placed in a tray and guyed to withstand the strong Bouvet wind".

The fundraising campaign has now reached the 90% of its target amount of donations and \$70,000 are still needed: see <https://www.3y0j.no/funding>.

ILLW ---> The 25th annual International Lighthouse/Lightship Weekend will take place from 00.01 UTC on 20 August until 24.00 UTC on the 21st. Complete information on this popular event, including a list of announced participating stations, can be found at <https://illw.net/>.
