425 DX NEWS MAGAZINE ---> The latest issue (March 2005) is now available in .pdf format only at <http://www.425dxn.org/monthly/>. It includes an article by Sarath Babu Rayaprolu, VU3RSB on the tsunami emergency on Andaman, "The Way We Were" (a selection of information published by 425DXN ten years ago), as

well as the usual features and several images. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA (iz3eba@libero.it).

600JT ---> Joe, 600JT (VA6JWT) expected to leave Somalia on 7 April. Once at home, he will start working on the QSL cards. [TNX The Daily DX]

COOK ISLANDS DXCC STATUS CHANGED ---> The following release, dated 2 April, comes from the ARRL's web site:

Issuance of a call sign prefix block for the Cook Islands has made them a DXCC political entity. "It has come to our attention that the International Telecommunication Union Table of International Callsign Series now contains an entry for the Cook Islands," said ARRL Membership Services Manager Wayne Mills, N7NG. "New Zealand has been issued the E5A-E5Z call sign prefix block for the exclusive use of the Cook Islands. As a result, the Cooks become a political entity for DXCC purposes." Mills says the impact on the DXCC List will be minimal, however. "In reviewing the distances, it appears that the first 'separation' from the South Cooks likely will be Palmerston Island, which is just over 350 km northwest of Raratonga," he explained. "The remainder of what has been known as the North Cooks is not sufficiently distant from Palmerston to become an additional DXCC entity." Mills says the main effect of the change will be for Palmerston to count for North Cooks instead of South Cooks. The change also may clarify a situation with the North Cooks. "Since the addition of the Manihiki Islands (North Cooks) in January 1959 was not based on a specific distance, Palmerston has counted as South Cooks," he said. "DXCC Rule 5a comes into play now, keeping both North and South Cooks on the list, but moving Palmerston to the North Cooks because it is more than 350 km from the South islands and becomes the first separation." Under the circumstances, Mills said, it might now be appropriate to rename the entity "Palmerston and the North Cooks."

FT5XO ---> The 2005 Microlite DXpedition to The Kerguelen Islands is now history. In an effort to equitably cover the variety of openings, bands, and modes available, the team actively reviewed the QSO stats each day and adjusted the operating plan accordingly. The first QSOs began at about 07.00 UTC on 20 March, the last QSO was made at approximately 02.00 UTC on the 31st. 11.5 days of operating netted 67,954 QSOs as follows:

Band	CW	SSB	RTTY	TOTAL
------	----	-----	------	-------

160m:	1173	16	0	1189
80m:	3578	957	0	4535
40m:	9643	2774	160	12577

Bob has not received any log update after that date and has been unable to contact Graham by e-mail.
