[TNX IZ8CCW]

THE IONOSPHERA PROJECT ---> "Ionosfera" is a project for DXers developed by AMSAT-Italia within the European Space Agency's (ESA) activities on Space Weather, a study of the various interactions between the sun (mainly) and the terrestrial environment influencing space-borne and ground-based technological systems and/or activities.

In particular, "Ionosfera" aims at supporting DX by correlating DX activity with Space Weather indexes, providing current propagation conditions for the various HF bands, providing and converting localisation data (locator, lat/long, etc), calculating Great Circle paths, predicting MUF/FOT.

The website for the project can be found at <http://esa-spaceweather.net/sda/ionosfera/index2.htm>: please review it, send any comment/suggestion to the AMSAT-Italia project team and participate actively in the project by sending your log files of HF DX QSOs covering the period 1 September 2003 - 30 April 2005. Should you need further information, please contact Florio, IW2NMB (iw2nmb@amsat.org).

UAE ---> Ghis, A6/ON5NT (9000 QSOs so far) reports that about ten new A61-one-letter-suffix callsigns/licenses have been issued recently to local operators. Ghis will be QRV from Dubai until the end of June, and then again during August and September. A special VU4 QSL Service will be available on 24 June (3-4 p.m.) and on the 25th (1-3 p.m.).
