How would you feel if you looked at your antenna from this perspective? Help Kadek!

HELP KADEK I Island chasers and hams throughout the world have been saddened by the news of Kadek's (YB9BU) material losses following the fire that destroyed his house in early April. "Help Kadek" initiative represents our way to show a friend that we care and that we do appreciate his long time dedication to the IOTA community. We hope that our support will help Kadek rebuild his radio shack and bring him back on the air. Please visit our web page at <http://www.mdx.org/yb9bu> to find more about this initiative and to contribute to this fund through one of the regional collection points.

MONTENEGRO I Quoting a spokesman from the ITU Radiocommunication Sector, The Daily DX reports that the 400-409 callsign prefix block has been allocated to Montenegro. Serbia will continue to use YTO-YT9 and YU0-YU9, while the 4N and YZ prefixes have been withdrawn and given back to the ITU for future use to another nation.

QSL 8Q7AK I Andrew, G7COD reports that all QSLs received for his last two activities from the Maldives (October 2006 and January/February 2007) have now been posted direct if sufficient postage had been included. If not, they have been sent via the bureau. All QSLs received via the bureau will also be returned the same way. Andrew will be back to the Maldives in October (details expected in due course).

QSL 9M4SDX I All of the direct requests received so far for the 9-19 March operation from the Spratly Islands have been processed and mailed. Tex, 9M2TO reports many cases of "missing in action" return postage, especially from Spain, and advises that IRCs are better than US dollars.

QSL AP2TN I As of 1 May 2007, the new QSL route is via DJ9ZB. If you sent a QSL request direct to Tariq and have not received your card, please e-mail your QSO details to him (ap2tn@yahoo.com).

QSL ST2R I Slavko, S57DX made about 18,000 QSOs (many of them on the low and WARC bands) during his activity from Sudan, between 3 January and 17 April. "Maybe the total number of QSOs is not very high", he says, "but all contacts were made with 100 W and almost all of them with simple wire antenna". The QSL cards are being printed, then Slavko will process

the direct requests received so far. Direct requests received without return postage or with old IRCs will be answered via the bureau. [TNX S57DX]

+ SILENT KEY +

I Earl Cunningham, K6SE passed away on 29 April. He was the developer of the "flag" and "pennant" receiving antennas used for low bands.

I "Hillar Raamat, N6HR passed away on 6 May", The Daily DX reports, "shortly after operating the 7 QSO party with his wife Elsie (N7YX)". Born in 1932, "Hil was originally from Estonia, immigrated to the USA after WW2, and became a very successful engineer in the defense business and a real estate entrepreneur. He made many operations from DX places like Marshall Islands, Ascension Island, and he was found active in many contests over the years. He was a DXer, contester and IOTA activator".

SCARBOROUGH REEF 2007

From 425 DX News # 835 I The team arrived at the rocks on 28 April at sunset local time, entered the lagoon at daybreak and worked throughout the day in setting up the stations. They managed to get one station operational as darkness fell, and BS7H made the first QSO on 29 April at 13.47 UTC. By 2 May four stations (two of them dedicated to 20 metres) on four different rocks were in full operating mode. All radio operations will cease at 00.00 UTC on 6 May (8 a.m. BS7H time). On 3 May Wolf Harranth, OE1WHC, from the Documentary Archives Radio Communications in Vienna, did an interesting interview with James Brooks, 9V1YC, one of the BS7H team members - go to <http://www.dokufunk.org/> and click on the "mehr>>" link. QSL via KU9C (Steven M. Wheatley, P.O. Box 31, Morristown, NJ 07963-0031, USA). The official press releases can be found at <http://www.scarboroughreef.com/srnews.html>

From 425 DX News # 836 I Scarborough Reef went QRT as scheduled, at about 00.00 UTC on 6 May. On-line logs are available at <http://www.scarboroughreef.com/srlog.html>; a few pictures can be found at <http://www.scarboroughreef.com/srphotos.html>

From 425 DX News # 837 I The recent operation from Scarborough Reef has been approved for DXCC credit. Quite a number of QSOs (1380, most of them on 30m) did not make it into the initial on-line log. The problem has been fixed and the log now contains 45,820 QSOs from 13.48 UTC on 29 April through 23.54 UTC on 5 May (<http://www.scarboroughreef.com/srlog.html>) with 17,884 unique callsigns.

The continental breakdowns are: Asia 21112, Europe 16329, North America 6918, Oceania 948, South America 301, Africa 212. Several statistic tables can be found at <http://www.scarboroughreef.com/srstats.html>, and photo galleries are available on the expedition's web site as well as on <http://picasaweb.google.com/paul.pescitelli/K4UJScarboroughReef> As for the cards, please refrain from e-mailing inquiries to the the QSL manager (KU9C), as he is not in a position to answer whether you are in or not in the log at the moment. "If you are not in the web log", he says, "don't give up, put down EVERY QSO you believe you had, and I'll do the rest. If the web log shows 20 SSB, put down EVERY qso you think you had on 20 SSB, not just the first". In case of busted calls, Steve will use "well-established judgement in issuing the card, and may ask you to help confirm

that the person whose call appears did not make a QSO". Finally, "if you DO NOT HAVE ANY detail besides what is in the web log online, it's impossible for me to give you credit for the card - I'm not in a position to issue a QSL to you 'just because' the web log says you're there. Not the way it works".
