GOOD TO KNOW

3B7FQ I Although propagation and conditions were poor, Rachid, 3B8FQ made 1,500 CW QSOs during his February activity from St. Brandon. He operated just a few hours each day, in between maintenance on the meteorological equipment on the island. Operation was concentrated on 30 and 17 metres, with limited activity on 40 and 20m. By the tenth day, the battery was not recharging properly, which resulted in reduced power and sending by hand key. Colour QSL cards have been printed and are being mailed. The QSL manager for all of Rachid's operations is K5XK (Ron Evans, 2 Pembroke Drive, Bella Vista, AR 72715-8823, USA). [TNX K5XK]

VK9GMW

I George, AA7JV and Tomi, HA7RY went QRT from Mellish Reef at 4 UTC on 13 April, after fighting storms, strong winds and heavy rains over the last few days on the island. They made 20,058 QSOs (2,028 were on 160 metres). The Online

QSL Request System (OQRS) has been activated for both direct and bureau cards (check <http://www.vk9gmw.com> for details). The ordinary QSL route is via HA7RY.

I While on Mellish Reef, the VK9GMW team realized that there was "some issue" with the WriteLog file for the period between 20.20 UTC on 9 April and 09.20 UTC on the 10th. They hoped to fix it later, but unfortunately their "support team's efforts to recover the WriteLog QSO data have not produced results yet" and they are now "seeking help from WriteLog". In the meantime, please refrain from sending any QSLs or OQRS requests for any contact that took place during those 13 hours: "we apologize, understanding how this may disappoint those who have made the QSOs, but as long as we can not recover the data, we will not able to QSL these QSOs".

VK9LA I Band and mode statistics for the 22 March-3 April expedition to Lord Howe Island can be found at <http://www.odxg.org/vk9la.htm>. The most productive band was 40m (9111 QSOs), followed by 20m (6714 QSOs) and 30m (4458 QSOs). The grand total is 30,160 QSOs (18842 CW, 9261 SSB and 2057 RTTY). A special piece of VK9LA memorabilia is being auctioned (see the website for the details). The money raised from the auction will be used to

repair equipment that failed whilst the team was on the island. The closing date for placing your bid is 30 April.

WARD AWARD I The WARD (World Amateur Radio Day) Award commemorates the World Amateur Radio Day celebrated by IARU on 18 April each year. The award is sponsored by MK QTC (the Polish Amateur Radio Journal) with the

Polish Amateur Radio Union's support, and it is issued to licenced amateurs and SWLs for contacts made/heard between 00.00 and 23.59 UTC on 18 April. Details can be found at <http://www.ward.pzk.pl> [TNX SP2FAP]

WCA I The World Castles Award is for working stations operating from castles located in Belarus, Belgium, Czech Republic, France, Germany, Great Britain, Ireland, Italy, Poland, Russia, Slovakia, Switzerland and Ukraine. Complete information can be found at <http://www.wcagroup.org> [TNX RN1CW]
