4W6A ---> 4W6A will be QRV on all bands and modes from Atauro Island

(OC-232), Timor-Leste on 16-26 September [425DXN 1039], and everything is on schedule for the expedition. Team members' air tickets have been booked and paid for, a boat has been chartered, the accommodation on Atauro and the generators have been booked, arrangements have been put in place for sufficient fuel to be transported to the island. Hopefully the team will be able to use an Internet connection on the island, and, if this proves to be reliable, logs will be uploaded to Club Log (www.clublog.org) and LoTW on a daily basis. The latest press release (11 May) can be found at www.4w6a.com, along with further information on the DXpedition and details on how contribute to the project.

MIDWAY ISLAND ---> "I have just been assigned to work on Midway Island as the Chief Communications Officer", Joe W5FJG says. "I hope to be on the air as KH4/W5FJG either the last week of May or the first week in June. I will be stationed here for at least one year.

At this time I have an Icom Ic-7000, but no antenna. I am working within the guidelines of the Island administrators on getting an antenna in the air to start off with. I intend to work from 6 through 40 (80 if a suitable antenna can be obtained). SSB, CW, RTTY and other digital modes will be worked.

I am seeking donations of (or funds for the purchase of) a Multi-Band Vertical and or smaller 3el yagi. Also looking for donations for other station equipment.

Since I will be here for one year or more, I am looking to build a permanent Amateur radio shack that will keep Midway on the air long after I have departed.

Will provide more info such as QSL route and operating times later". Joe can be contacted at joeyjeepusa@yahoo.com

MILLS ON THE AIR ---> The Mills On The Air weekend will be held on 14-15 May, with amateur radio operations taking place from several mills in the Netherlands and in the UK. Announced activities include PD6MILL from De Eendracht (QSL via PD7BZ) and GB6MW from Meopham Windmill (QSL via G4DFI). Further information on the event can be found at www.pd6mill.com [TNX PD5JFK and M0MCV]
