HEARD ISLAND 2014 ---> Updates of the team and the Project Description (version 4.3) are now available at www.heardisland.org. "You will see in the Project Description that we have developed a wide-ranging scientific program, including radio operations (the DXpedition), real-time communications, mountain science, biological science, atmospheric science, astronomical science, documentation, and educational outreach. We are proposing that the AAD collaborate on some of the research.

We are interested in establishing a collaboration with any person or group that can fit into the research program (or extend it). The next NEWS update will be on 15 September. The next round of team members will be announced on 15 October, but if you are interested in joining the team (on the island or offsite), we invite you to contact us anytime."

PT0S & 6 METRES ---> The PT0S team will be making a special effort to put St. Peter and St. Paul Rocks on 6 metres during its 12-24 November operation. "We have experienced 50MHz operators", they say, "and will be taking high performance gear to effectively exploit openings. We'll operate on SSB and CW and an additional effort will be made for 6m EME, during the time when the moon is at the horizon". Please visit <http://pt0s.com/> for further information.

QSL HKONA ---> As of 8 August, all traditional direct requests received through 31 July (with appropriate return funds) and all OQRS direct requests received through 5 August have been processed and mailed - a grand

total of 74,190 QSOs. "The QSL process has been temporarily 'paused' while we give all of our special QSL processors and handlers some time off", N200 says. "We will re-start direct QSLing in early September, then start on the OQRS bureau requests soon after". The logs were uploaded to LoTW on 10 August, but some QSOs are missing. N200 is aware of the problem and is working on this with ARRL.

QSL VU7M ---> The new address where to send direct cards for the current DXpedition to Minicoy Island (AS-106), Lakshadweeps [425DXN 1109] is: 9026 Phillip Dorsey Way, Columbia MD 21045, USA. This is just a mail drop, as the actual QSL cards will be mailed from India. Include a self addressed label (SAE non required) and at least two US dollars.

QSL YV7/UA9YAB & YV5/UA9YAB ---> The QSL cards for the late UA9YAB's operations from IOTA groups SA-012 (YV7/UA9YAB) and SA-035 (YV5/UA9YAB) will be handled by UA9YPS. QSL direct only to Aleksandr Y. Shishkin, ul. Kalinina 18-18, Rubtsovsk, Altajskij kr., 658213, Russia.

+ SILENT KEY + Aleksandr A. Vedernikov, UA9YAB (aka XU7AEQ and JT0YAB) died unexpectedly on 9 August during his vacation in Venezuela (YV7/UA9YAB and YV5/UA9YAB) [425DXN 1099]. He was only 50 years old, and leaves behind his wife Nataliya and two children. DX World.net has now set aside a dedicated page (<http://dx-world.net/ua9yab-family/>) for donations to be sent to help offset the high costs for returning Alex's body home.
