We are open to the possibility of taking one or two 'guest/sponsors'. We have nearly the entire original team intact, although a recent withdrawall has opened a position. If you or anyone you know is interested, please contact me immediately". The timing of this Dxpediton (15-27 January, 1997) is ideal for emphasizing the Low Bands (160, 80, 40 and 30 metres), as this winter will see the "peak" of the low band propagation in the solar cycle. Good openings are anticipated on 20, 17 and 15 metres as well with fair, sporadic openings on 12 and 10 metres. Extensive use of pilot operators will help the Heard Island team gets feedback to ensure success of the DXpediton.
