9M0C ---> The 9M0C operation closed down on 24 February after making well over 65,000 QSOs with over 180 DXCC countries. The team was able to run four high-power (400 watt) stations round the clock and two further low-power (100 watt) operating positions enabled them to be on two additional bands at key times. Some further analysis on the logs is needed, but a preliminary band breakdown is as follows (CW/SSB/RTTY): 1150/0/0 (160 metres), 2854/1395/0 (80 metres), 6599/4267/0 (40 metres), 5710/0/0 (30 metres), 4675/7396/1390 (20 metres), 3540/2998/77 (17 metres), 4784/7089/543 (15 metres), 3020/2576/0 (12 metres), 2048/2634/70 (10 metres), 262/127/0 (6 metres). The total is 65,204
