>>> EAST TIMOR <<<
>>> NEW DXCC ENTITY <<<

The International Telecommunications Union has communicated to the United Nations the assignment of the prefix block 4WA-4WZ for use by radio stations within the areas administered by UNTAET (United Nations Temporary Administration of East Timor). This prefix assignment is for the use of UNTAET as long as it exists, and will be released to the ITU at the end of its existence.

UN stations within East Timor may be assigned 4U prefixes for official use, while UN Amateur stations may use the prefix 4U1 (this includes the UN Amateur Radio Club station, 4U1ET). All other private and Amateur Radio stations in East Timor will use the prefix 4W6. Individuals who expect to be there less than one year would use 4W6/ home call, while those who will be there in excess of one year may obtain 4W6 callsigns. Permanent residents of East Timor who were previously licensed may also obtain permanent callsigns.

For DXCC purposes, UN Temporary Administration of East Timor will be added to the DXCC List with the effective date of March 1, 2000. QSL cards for QSOs made after that date will be accepted on and after October 1, 2000.

For further information please contact Bill Moore, NC1L at bmoore@arrl.org

>>> TX0DX - CHESTERFIELD ISLANDS <<<
>>> 23 March - 1 April <<<

The Chesterfield Islands (OC-176) DXpedition team now consists of FK8GM, FK8HC, JA1BK, N5KO, N7NG, OH1RY, OH2BC, OH2BH and OH2RF. They are expected to depart for the Chesterfields early Sunday morning (FK time).

While the call TX8CI will be used during the early phase of the operation, the TX0DX call sign is expected to be activated at 00.00 UTC on 23 March, once it has been determined that the IARU vote has confirmed ARANC (Association des Radio Amateurs de Nouvelle Calédonie, the amateur radio society of New Caledonia) as an official IARU member society. This would be the "Event Date" for the proposed new DXCC entity. DXCC status for the

Chesterfields will still require an affirmative vote by the DXAC regarding Section II criteria.

The following transmit frequencies will be used by TX0DX:

CW: 1834.5, 3504, 7004, 10104, 14024, 21024, 24894, 28024 and 50115 kHz

SSB: - 3790, 7085, 14195, 18145, 21295, 28945, 28480 and 50115 kHz

During the WPX SSB Contest (0000 UTC 25 March through 2359 UTC 26 March), the transmit frequency 21445 kHz will be used.

Four HF stations and a dedicated 6-metre station will be used. Two stations (one on 15 metres SSB and one on 15 metres CW) will be activated on a nearly continuous basis to provide everyone a reasonable access to their first QSO. Other bands will be activated to capture complimentary openings to various parts of the world. Since TX0DX is potentially a new DXCC entity, the goal of maximizing the number of individual DXers logged will guide the operating strategy.

This DXpedition is highly dependent on the weather situation since it is taking place during the typhoon season. There may be variations in the operating dates to dodge any major storms. The team has promised that if there is a weather-related delay they will stay longer to give as many as possible the new country.

The chief pilot will be Bill Avery, K6GNX (k6gnx@telemetry.com) and the most important feedback will be your e-mails giving the opening, peak, and closing times of band openings to your area. Regional pilots F6AJA, FK8CR, JH1KRC, OH2BN, N4GN and VK3EW will assess the pileups in their respective areas and inform K6GNX by e-mail of any issues.

The DX community may also follow the DXpedition's progress through the TX0DX web site (<http://www.n4gn.com/tx0dx/>), which will be updated regularly as the operation proceeds.

QSL TX0DX for HF QSOs only via OH2BN either direct (Jarmo J. Jaakola, Kiilletie 5C30, Helsinki 00710, Finland) or through the bureau.

QSL TX0DX for 50 MHz QSOs only via JA1BK either direct (Kan Mizoguchi, 5-3 Sakuragaoka 4 Chome, Tama-City, Tokyo 206-0013, Japan) or through the bureau. [TNX N4GN]

+ SILENT KEYS + Hans-Georg Goebel, DK1RV reports the sad news of the passing of Guenther, DF4DI (aka ZK1DI, F00DI, P29VDI etc) on 15 March. Guenther had been ill for 13 years, but this did not prevent him from operating from rare spots (between 1995 and 1999 he was active thrice from Rarotonga and logged more than 40,000 QSOs with just 100 watts and wire antennas). From November 1999 to early March 2000 he was in 3B9, but was unable to get a licence. We were also informed by Nuccio, I0YKN of the death of Mimmo, IK8TWP, who operated from several Italian Islands Award programme locations.
