T88SI: The complete log for the February operation from Sonsorol Island (OC-248) is now available at either <http://www.425dxn.org> and on the Diamond DX Club's web site (<http://www.ddxc.org>). Cards are expected to arrive from the printer within the end of the month and the QSL manager will begin processing the requests immediately. QSL via IT9YRE (Ferdinando Rubino, P.O. Box 30, 96012 Avola - SR, Italy). Details on the operation will be published in the April 425DXN Monthly Edition; pictures are already available at <http://www.425dxn.org>

VP6DI: The official web sites for the operation are:
Logs <http://www.big.or.jp/~ham/VP6DI/>
Pilot Info/Latest News <http://www.qsl.net/aa0mz/ducie.htm>
General Information <http://www.qsl.net/wd4ngb/ducie.htm>
Part of the logs have been uploaded using a 1200 Baud modem and satellite phone. They are from a very early stage of the operation, so do not panic if you do not find your call/QSO. Mike, VK4DX reports he has included a few audio files from the Ducie pileup on his web site (<http://www.vk4dx.net>). He has also updated his Contest Calendar with Australian and US events.

XR0X: The team has been forced to temporarily discontinue updating the web log server. Logs through approximately 20 March at 18 UTC were uploaded on 22 March (check <http://cordell.vwh.net/SFX/>), after which expect a delay for further updates: "The HF pactor link has been very slow due to propagation problems", the team reports, "and requires us to use one of our valuable HF stations for long periods of time which means that we are spending time uploading data instead of working you".
