ANTARCTIC BASES ---> WABA Directory 2003 is the official source of information for the IOTA Programme on Antarctic Base stations. It acts as an extension of the IOTA Directory, providing the IOTA reference number as well as a wealth of detailed historical information on each base. The Directory is downloadable from the 425 DX News website at <a href="http://www.425dxn.org">http://www.425dxn.org</a> [TNX G3KMA]

ARI DX CONTEST ---> The A.R.I. International DX Contest, sponsored by the Italian amateur radio IARU Society, is open to either licenced amateurs and SWLs. This year's event will take place from 20 UTC on 1 May to 19.59 UTC on the 2nd. Full rules and information, including a brand new software downloadable for free, are available at <a href="http://www.qsl.net/contest\_ari">http://www.qsl.net/contest\_ari</a>

DXCC NEWS ---> The recent C56JJ operation by Jan, PA4JJ (formerly known as PA9JJ) has been approved for DXCC credit.

INTERNATIONAL MARCONI DAY ---> Organised by the Cornish Radio Amateur Club, G4CRC/GB4IMD (http://www.cornishradioamateurclub.org.uk) the International Marconi Day (IMD) is a 24-hour amateur radio event held annually to celebrate the birth of Guglielmo Marconi (25 April 1874). It is not a contest, but an opportunity for amateurs around the world to make contacts with historic Marconi sites using HF communications techniques. Details, including information on the relevant Award Certificates and the listing of participating station in this year's event (to be held on 24 April), can be found at http://www.gb4imd.co.uk/index.htm

IOTA DIRECTORY ---> The 40th Anniversary Edition of the IOTA Directory will be published around 19 April and will be available from RSGB HQ shortly afterwards (see www.rsgb.org/shop/ or telephone Sales at +44 (0)1707 659015). Larger than ever with 136 pages, this anniversary edition features an historical review, much of which has never previously been published as well as Geoff Watts' original IOTA list of 1964, fascinating for what it includes as wellas for what it omits. It includes all you have come to expect of the Directory - the latest IOTA island listings, DXpedition stories, the Most Wanted List, and articles on how to get started in IOTA. Readers, who have been active on the bands for several years and want help in identifying operations that count, will find the listing of operations accepted for credit quite invaluable. This list was first introduced in the 2002 Directory and is now updated and expanded to cover the 650 rarest IOTA groups. Using it could save you hours in preparing your application. And for the first time the Directory includes the current year's Honour Roll and other performance listings. [TNX G3KMA]

NEW BOOK ---> Ward Silver, NOAX is the author of "Ham Radio for Dummies" (ISDN 0-7645-5987-7), written for new licencees who have the "What do I do now?" feeling after passing the exam and for prospective hams to understand what amateur radio has to offer and how to participate. Ward's goal in writing this 384-page book packed with explanations, tables, graphics, photos and links to on-line resources was "to produce the book I wish I'd had when I was just starting out - a Desktop Elmer, so to speak". If you're interested, just enter the title into a Web search engine and find your favorite bookseller.

NEW IOTA CERTIFICATES ---> The new Directory announces the addition of three new certificates to the programme's current range, for contacting 800, 900 and 1000 IOTA groups. These will be of the same design as other certificates in the 100 series. The 1000 Islands certificate will be sent free of charge to each member reaching that level whether or not the 1000 Islands Trophy is requested. The 800 and 900 Islands certificates will be charged for on the same basis as other certificates. To ensure fairness of treatment in the issue of low number 800 and 900 Islands certificates, a period of several weeks will be allowed for members to apply through their checkpoints. At the end of that period the certificates will be issued, numbered in the order of the applicant's score on the central IOTA database. So, if you qualify and are interested, please apply before 1 August 2004 via your checkpoint. Certificates will be despatched in September. [TNX G3KMA]

QSL 9U5M ---> Cards have arrived from the printer and Dennis, PA7FM is currently processing direct requests. "Still quite some direct requests

arrive with unsufficient return postage or even without SAE", Dennis reports. These will be replied to via the bureau.

QSL FM/T93M ---> Please note that the QSL manager for Danny's recent operation is DJ2MX (Mario Lovric, Kampenwandstrasse 13, D-81671 Muenchen, Germany). Cards sent to Danny's address is Sarajevo will be forwarded to Mario, but expect some delay in processing these requests. [TNX T93Y]
