## IN MEMORIAM

**Fausto Minardi, I4EAT** died of Covid-19 on 31 March aged 71. Your trulies have lost a dear personal friend, and Italy has lost one of its top DXers.

Licensed since 1968, during the Seventies Fausto operated almost exclusively on 2 metres. While experimenting with all propagation modes, in 1978 he made the first ever 2m EME QSO from Italy, and in 1979 he established a TEP world record (QSO with ZS3B, nearly 8,000 kilometres away).

Fausto started activity on the other bands in 1979, and in August 1982 he got his 5BWAZ with 200 Zones. He made the first Top Band QSO in 1984: «for several years my chances were limited due to very modest setup», he recalled, but «with the new century I have experienced the extraordinary performance of the beverage antennas and my score on that band really improved». He became QRV on 6 metres in April 2001, and it took only seven months for him to work the 100th Entity on the Magic Band. Fausto's latest scores on 160 and 6 metres are 317 and 229 respectively; his current/total DXCC Honor Roll scores are 340/357 (Mixed), 340/357 (Phone), 339/349 (CW) and 332/335 (Digital).

With 3129 band points, he won the 2007 DXCC Challenge DeSoto Cup and took the title away from W4DR for the first time ever. Fausto maintained the lead until 2012; the current DXCC Challenge standings see him in third place with 3239 band points.

In 1999 he entered the IOTA Programme and developed a genuine enthusiasm for island chasing. The latest IOTA Honour Roll Listing shows I4EAT with 1116 groups out of a possible 1136 that have seen activity, and he still leads the IOTA VHF Listing with 221 credits.

**3Y0I: BOUVET 2021** • «First of all, we would like to wish the recently announced 3Y0J Bouvet DXpedition all the best for a successful activity in 2023», the Rebel DX Group posted to their Facebook page on 5 April. «There is enough space for even 3 more activities from 3Y0 land. We know how much detailed planning goes into a project like this and cross fingers for them.

From a Rebel perspective, the 3Y0J announcement does not change our plans. December 15, 2021 is when we plan to leave Cape Town and again head south into the Roaring Forties and Furious Fifties before attempting a Bouvet landing. We absolutely know from experience how volatile the seas around this most remote island are.

Our team of 8 operators aim to spend up to 30 days on Bouvet. Depending on weather, we will likely spend 7-10 days each way on the high seas getting there and returning. Once on the island and our camp is set up, we will run 8 stations covering 160-6m. Modes include CW, SSB, FT4/FT8, RTTY and OQ100. The total budget for our Bouvet DXpedition is considerably less than that of 3Y0J. We also have had no backing from any of the DX foundations. Nonetheless, we are now missing only \$32,000 from our final cost of \$267,000. We absolutely hope between now and December we can accrue this missing amount, and appeal to all generous donors to help us with our final push to meet target». Bookmark <https://www.facebook.com/rebeldxgroup/> as «more info will be posted soon».

**3Y0J: BOUVET 2023** • The Intrepid DX Group has announced plans to be active as 3Y0J from Bouvet Island (#2 Most Wanted DXCC Entity) in January- February 2023. The group has been planning this major DXpedition since the successful 2016 operations from the South Sandwich Islands (VP8STI) and South Georgia (VP8SGI).

In January 2023, a team of fourteen skilled and seasoned operators (team co-leaders N6PSE and LA7GIA; AB5EB, DL6KVA, HA0NAR, JH4RHF, K6TD, KO8SCA, LA7THA, LB1QI, N2WB, N7QT, W1SRD, WD5COV) will depart Cape Town on the RV *Braveheart* and embark on a 42-day voyage to Bouvet Island and back.

Plans are to make a shore landing and an arduous climb up onto the edge of the glacier, to stay at Bouvet for twenty days (weather permitting) and to operate CW, SSB and digital modes (FT8/FT4 and RTTY) on 160-10 metres for 14-16 days.

«Each team member will contribute a minimum of \$20,000 each and your donation will be spent on securing the budget of \$764,000». More information, including QSLing policy, can be found on <https://3y0j.com/>. Updates will be posted also to Facebook: <https://www.facebook.com/groups/901378553769436/>.

**4U1A: QRX OR QRT?** • Located at the UN International Centre in Vienna, Austria, the Amateur Radio Contest DX Club (4U1A) has been very active since 2014. The club has now «entered a period of severe turbulence», as they have been told that their antenna systems «do not comply with new fire safety rules and other standards and will be dismantled by the VIC building maintenance service by the end of March 2021». Reinstalling the antennas will take a lot of time and money, as the work must be done «by a company certified by the UN in Vienna and fully authorized to do so». The club «will gratefully accept any donation to support the club and cover the costs of the work»: see <http://www.cqdx.ru/4u1a/arcxdc/4u1a-arcxdc-2021-qrt-or-qrx/> for information.

**7D5RI** • The logs for the 7D5RI DXpedition to Rupert Island (OC-245) have been uploaded to Club Log. The logsearch contains 2,089 QSOs made on 25-27 March. QSL via EA5GL (see <https://www.qrz.com/db/ea5gl> for PayPal instructions for direct cards).

**AGCW GOLDEN JUBILEE** • Joining special event stations DR50AGCW and DP50AGCW in the celebrations for the 50th anniversary of the Activity Group CW (<https://www.agcw.de/>) on 1-31 May will be CR50AGCW, GB50AGC, OE50AGCW, PA50AGCW, SN50AGCW, YL50AGCW and Z350AGCW. QSL via operator's instructions.

**CLUB LOG ACTIVITY REPORT: 2021 UPDATE** • «As in previous years, I've generated some new reports to reveal trends about how we're using different modes on the bands», Michael, G7VJR posted to his website on 27 March. «This year, I've generated a few extra reports to try and explore other relevant trends about activity levels (working from home, perhaps?) and the use of different bands (which correlates well with solar activity)». At the time of writing, «Club Log has 731 million QSOs recorded, which is sufficient for trends found in the data to be robust». The report can be found on <https://g7vjr.org/2021/03/club-log-activity-report-2021-update/>.

**CYOC: SABLE ISLAND 2022** • The CYOC team posted to the DXpedition's website (<http://cy0DXpedition.net/index.html>) that their October 2021 operation from Sable Island [425DXN 1554] has had to be postponed due to the ongoing Covid-19 pandemic. «Furthermore, because of the pandemic, Parks Canada is behind on their island maintenance projects and the Visitor Quarters will not be available for the DXpedition team. The Sable Island manager did extend an invitation to the team for October 2022, which the team unanimously accepted». Since the 2021 DXpedition is no longer possible, the team «is offering a couple of options to the many foundations, clubs and individuals who have already sent financial support. We are offering complete refunds to those who request a refund. If you would like us to apply your contribution to the 2022 CYOC DXpedition, that will be available as well. Any refund requests should be directed to WA4DAN».

**INTERNATIONAL MARCONI DAY** • Organized by the Cornish Radio Amateur Club, the International Marconi Day (IMD) is a 24-hour amateur radio event held annually to celebrate the birth of Guglielmo Marconi (25 April 1874). It is not a contest, but an opportunity for amateurs around the world to make contacts with historic Marconi sites using HF communications techniques. This year's event will be held on 24 April, from 00.00 UTC to 23.59 UTC. Details, including information on the Award Certificates and the listing of participating stations, can be found at <http://gx4crc.com/>.

**JAPAN INTERNATIONAL DX CW CONTEST** • Object of the contest is for amateurs in Japan to work as many stations in as many DXCC Entities and CQ Zones as possible on 160, 80, 40, 20, 15, and 10 metres, while DX stations work as many JA amateurs in as many Prefectures and JD1 islands as possible. This year's event will be held on 10-11 April (07.00-13.00 UTC). Complete information can be found on <http://jidx.org/jidxrul-e.html>.

**OH NORTHERN LIGHT 100-YEAR CERTIFICATE** • The Finnish Amateur Radio League (SRAL) is celebrating its 100th anniversary. Multiplying your QSO points (maximum 100) by your multiplier value (max 10) will give you your score - maximum of 1000 points. On 17-18 April a minimum of five multipliers will be QRV: OG2B (operated by OH2BH, OH2GEK and OH7EA), OH100SRAL (operated by OH2BCI and OH2KW), OH2A (operated by OH2KI and OH3JR), OH6SRAL (operated by OH6ZS) and OI3AX operated by OH2LGW). For easy logging, please use the special activity sheet at [https://www.sral.fi/wp-content/uploads/2021/04/SRAL-100\\_Logging.pdf](https://www.sral.fi/wp-content/uploads/2021/04/SRAL-100_Logging.pdf).

A special lottery will feature additional special prizes that will be announced later. Your log extract should be sent to the Santa Claus offices (of9x@sral.fi) during January 2022. The same address will answer all questions relating to this centennial activity. [TNX OH2BH]
