1500 AND COUNTING

It all started back on 11 May 1991. After nearly twenty-nine years, 425 DX News celebrated on 1 February 2020 its issue #1500 - that's 1500 weeks of uninterrupted, free of charge service to the DX community. Many things, including DXing itself, have changed over nearly 29 years. Our passion and enthusiasm has remained unchanged ever since, though. For us who are part of the 425 DX News Team this is a festive moment to share with our readers, as well as the right moment in time to renew our commitment to the DX community worldwide.

QSL via DF8AN, direct or bureau. He does not use Club Log or LoTW.

CENTRAL AMERICA TRIP • Gerhard, OE3GEA will be active as YS/OE3GEA from El Salvador on 26-28 February. He will then move to Nicaragua and be active as YN3GEA from the mainland on 1-6 March and from the

Plans are to operate CW, FT8, FT4 and SSB on all bands. Look for TX4N and 3D2AA to participate in the ARRL DX CW and SSB Contests, respectively. QSL for all call signs via EA5GL.

The project is on schedule", the VP8PJ team reported on 2 February in their Press Release #11. Team members will begin arriving in Punta Arenas on 9 February. The *Braveheart* is scheduled to depart for Signy Island, South Orkneys (AN-008) on 15 February. Shortly before she leaves Punta Arenas, the Garmin inReach personal locator will be activated. You will be able to follow her voyage during the estimated six days at sea to and from the island by going to <https://share.garmin.com/sorkney>. Look for the team to be QRV as ZL1NA/mm during the voyage.

- **Band Plan:** it can be found on the DXpedition's website (<https://sorkney.com/>: click "Operating Plan" in the dropdown menu under the "Island Operations" tab). Unless otherwise announced by the operator, all radio operations will be split. FT8 will use Fox/Hound mode on all bands except 60m.
- **Propagation:** Stu, K6TU has made available his "Propagation As a Service" tool at no cost to you. Accessed from the DXpedition's website (click on the "K6TU Propagation Tools" tab), the tool is configured with VP8PJ's station and antenna specifications; all you have to do is to enter your Maidenhead Locator and your antenna configuration, and the tool will generate your customized propagation charts.
- **Reflector:** it is available at Groups.io (<https://groups.io/g/VP8PJ>) for you to provide thoughtful and helpful information to the team (no requests for log checks, busted calls, not in log, or schedules). The pilots will monitor the reflector and summarize pertinent information by region. They will still perform their normal functions, though, so feel free to contact your regional pilot as found on <https://sorkney.com/pilot-team/> should you wish not to post to the reflector.
- **Log Search:** assuming a stable satellite connection, QSOs will be uploaded to the log server in near real-time. QSL via M0URX's OQRS for direct and bureau cards (<http://www.m0urx.com/oqrs/>, to be enabled within ten days after the team leaves the island), or direct to M0URX. The logs will be uploaded to LoTW six months after the DXpedition (but early donors will receive their LoTW confirmation while the team is on the island). The QSL manager will work on Busted Calls and Not in Log issues after the log is validated. Please use the form on Tim's OQRS site, and do not send e-mails.
- **Fundraising:** 55 clubs/foundations, over 600 individual donors and 73 Premier Sponsors have supported the project so far. Those who donate before 15 February will receive their LoTW confirmation(s) usually within 24 hours of the contact(s). All other donors will receive their LoTW confirmation(s) when OQRS opens. All donations are appreciated and will help offset the project's estimated cost of about 310,000 USD. "With the *Braveheart* and freight bills paid and the equipment in Chile", the team says, "our last remaining major expenses are shipping the equipment back home, generator fuel, port fees, general surcharges, fuel surcharge and a few smaller but still significant expense items. It's not unusual for unexpected fees and other charges to materialize so we remain vigilant with the budget management".

From 425 DX News #1503 (22 February)

The *Braveheart* reached Signy, South Orkney Islands on 20 February. The team reported they had "ice to contend with regarding our planned landing area", and waited for the winds to change and blow the ice out. The following day they were able to get the equipment ashore and move it to their preferred site. The team anticipates that it will take two days (21 and 22 February) to set up camp.

From 425 DX News #1504 (29 February)

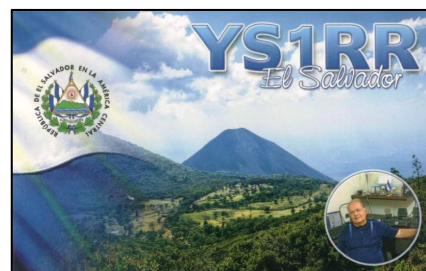

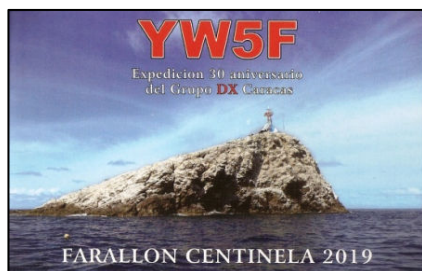

The team has been on the air from Signy, South Orkney Islands (AN-008) since late 22 February, and is working hard to hand out as many QSOs as possible under very cold, windy and snowy weather conditions. Having a consistent and stable connection with the available satellites has shown to be a challenge. The terrain on the island blocks the path to the satellite, and the team can only send the logs from the *Braveheart*, as and when they can.

So far the online log includes 38276 QSOs made from 23.56 UTC on 22 February until 12.24 UTC on 28 February: <https://www.m0urx.com/oqrs/logsearch.php?dxcallsign=VP8PJ>.

As for FT8, "RR73, but not in log" is a known issue and a "historic problem for DXpeditions", the QSL manager (M0URX) says. "10% of all FT8 QSOs will be dropped and cannot be entered into the log until after the DXpedition". The operators are aware of this problem, so "please no email, phone calls, texts, WhatsApp", M0URX says. The "Not in Log?" form on his website will be enabled when the log is consolidated at the end of the DXpedition. "If you are not in the log, make a security QSO if you can, or wait un-

til this function will be enabled".

The new forums focus on antenna law, regulatory issues, and support for new amateur radio licensees. They join an ARRL discussion forum lineup that already includes ARRL-Contesting, ARRL-Awards, ARRL-IARU and ARRL-LOTW, all open to the amateur radio community. For more information see "ARRL Expands its Roster of Online Discussion Groups" on <http://www.arrrl.org/news>.

FT4 SPRINT CONTEST • The Strange Radio Team organizes the "FT4 Sprint Contest Italia 40m" that will run on 2 February from 8 to 16 UTC. Only contacts made by Italian stations with Italian stations can count for this short duration event.

IOTA HONOUR ROLL • The 2020 Honour Roll and Annual Listings have been posted on the IOTA website <https://iota-world.org/>: click on PERFORMANCE LISTINGS in the dropdown menu under PROGRAMME INFORMATION. They show the position as at 31 January 2020.

The Honour Roll lists the stations with a checked score equalling or exceeding 50% of the total of numbered IOTA groups, excluding those with provisional numbers, at the time of preparation. The Annual Listing lists the stations with a checked score of 100 or more IOTA groups but less than the qualifying threshold for entry into the Honour Roll. IOTA rules limit inclusion in the listings to those participants who have updated their scores at least once in the preceding five years (i.e. since February 2015) and have opted to have their scores published.

T30ET: POSTPONED • Alex, 5B4ALX had extended his stay on Tarawa [425DXN 1489], and was expected to be active as T30ET from 18 March to 6 April. Then he was informed that, owing to the coronavirus outbreak, he was required to undergo a 14-day quarantine in Honiara (Solomon Islands) and to obtain a medical clearance before travelling to Kiribati. His operation is therefore postponed, "indicatively to October". He is also considering - if "Singapore Airlines does not agree to reprotect me in October, rather than losing 5000 EUR of tickets and baggage allowance - an alternative destination that can be reached from Brisbane without travel restrictions, but I don't see many alternatives at the moment". Bookmark <http://www.5b4alx.cloud/t30et-tarawa-atoll-2020/> for updates.

TI9A • The OQRS for the recent DXpedition to Coco's Island is now up and running on Club Log. The team made 29,397 QSOs (CW 19322, FT8 8518, SSB 1557) with 10,246 unique calls from 00.36 UTC on 2 February until 16.33 UTC on 7 February. The most productive bands were 80, 40 and 30 metres. Read the TI9A story on <https://dx-world.net/ti9a-cocos-island/>.

V6 IOTA DXPEDITION ON HOLD • Cezar, VE3LYC and Adrian, KO8SCA expected to be active as V62P (requested callsign) from Polap Atoll (OC-155), and as V62S (requested callsign) from Satawal Atoll (OC-299, new one for IOTA) during the first half of May. The project is currently on hold, though, because Micronesia has been placed "under a state of emergency to address the effects of the coronavirus. As a result, visitors from countries where contamination cases are reported will be denied entry, unless they undergo a 14-day quarantine in Hawaii or Guam. The team cannot afford the additional time and expenses associated with the quarantine provision. Consequently, we remain in stand-by", VE3LYC announced on 20 February, "waiting for the state of emergency to be lifted. Depending on when this will occur, we will either confirm the existing time schedule or negotiate with the charter provider in order to establish a new time schedule". Bookmark <https://v6iota.weebly.com/> for updates.

YASME EXCELLENCE AWARDS & SUPPORTING GRANT • In 2008 The Yasme Foundation (<http://www.yasme.org/>) established the Yasme Excellence Award, to be presented to individuals and groups who, through their own service, creativity, effort and dedication, have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement, as all three are necessary for amateur radio to grow and prosper. The Yasme Excellence Award is in the form of a cash grant and an individually-

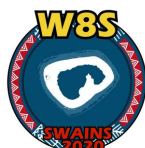

engraved crystal globe.

The latest recipients, announced on 14 February, are **James Sarte, K2QI** and **Adrian Ciuperca, KO8SCA** "for their efforts in combining the latest state of the art technology, diplomatic skills, persistence, and leadership. Additional help with gathering equipment and logistical support was provided by RA9USU, NT2Y, NT2X, K2LE, and N2UN (SK), culminating in reactivation of the United Nations Club Station 4U1UN".

The Board of Directors of the Yasme Foundation has also made the following grants:

- Ethiopian Amateur Radio Society (ET3AA) for VHF equipment.
- Support to the SU8WRC/SU8X demonstration station at the World Radio Conference in Egypt.
- YOTA (Youth On The Air) and HamSCI displays at Dayton Hamvention 2020.
- Contest University at Dayton Hamvention 2020 - support of audio/visual equipment, student materials (handouts and books), and live internet streaming connections.
- Hrvatski Radioamaterski Savez, HRS (Croatian Amateur Radio Association) to support YOTA 2020 Region 1 conference. [TNX K4ZW]

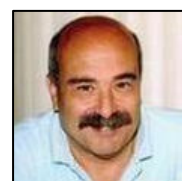

YOUTH CONTEST PROGRAM 2020 • Applications are now open for YOTA's Youth Contest Program 2020. Young operators (aged under 26 years) from IARU R1 member societies are invited to take part in a contest from "Top Gun" stations. They will "learn how to operate the contest station, improve their contest skills, and will aim for the best results together as a team". See <https://www.ham-yota.com/youth-contesting-program/> for complete information.

W8S: NEW DATES • The DXpedition to Swains Island has been postponed because of the travel restrictions and the 14-day mandatory quarantine in Hawaii imposed by the Department of Health of American Samoa as a result of the coronavirus outbreak. The team is now scheduled to be on the island from 23 September until 6 October. Bookmark <https://swains2020.ildxt.eu/> for updates.

+ SILENT KEY + Gabriele Gentile, **I K3GES** passed away on 15 February after a long illness. Born in 1947, since 1991 he handed out thousands of QSOs to island chasers, operating from his motorhome from nearly 50 IOTA groups in Bulgaria, Croatia, Denmark, Estonia, Finland, France, Germany, Greece, Italy, Norway, Poland, Spain, Sweden, The Netherlands and Turkey. He was also a QSL manager, notably for Elvira, IV3FSG (5H1ES, 5V7SE, 6W/IV3FSG, E44YL, FK/IV3FSG, J20SE, TL8ES, TT8ES, XT2SE, YJ0ASG, etc), as well as for Claudio, IV3OWC (9E1C, ST2CF,
