BOUVET 2022: 3Y0J YOUTUBE CHANNEL • «This narrow area of volcanic rock at Kapp Fie will be our QTH, 250 feet above the black sand beach where we will be landing in Zodiacs. See it now in 4K HD full screen mode. Yagis, verticals and our tents will be up here»: <https://youtu.be/YaMaR21075U>. The team plans «on having video updates from landing to leaving and all the fun in between», including interviews with all the operators.

BOUVET 2022 • 3Y0J LATEST NEWS

On 27 October the following Press Release #6 was posted to the website (<https://www.3y0j.no/>) of the November 2022 3Y0J DXpedition to Bouvet Island:

We have reached our first payment milestone for the Marama vessel contract. Today we have paid the first deposit, and with this payment we confirm our plans of activating the #2 most wanted Entity Bouvet. We would like to thank each individual and club who has contributed to this payment with their upfront support, especially thanks to our Lead sponsor NCDXF. It is a huge task and undertaking to go to Bouvet and we still critically need additional upfront support to close the budget.

We are happy to announce two additional operators to the team to make it complete with 13 operators. Dave WD5COV will rejoin us on this adventure to Bouvet. Dave is a well-known and recognized DXer and DXpeditioner who has embarked on over ten major DXpeditions, including three in the top ten most wanted category.

In addition, we have included Peter in the team as a combined crew and dedicated FTx operator. Peter is an experienced captain and expedition leader with huge experience from off-shore sailing, sailing in remote polar uncharted areas and specializes in supporting some of the most complex expeditions in the Arctic and Antarctica. He is experienced in safety evacuation procedures, MOB maneuver in cold water, beach landings in difficult locations and he is an experienced zodiac operator that will be based in Norway. He will be heading up the zodiac landing at Bouvet.

Our preparation for Bouvet includes planning, constructing, and testing a system for landing zodiacs safely, this will be tested in rough sea in Norway before and after Christmas. We plan for several systems and techniques to adapt to the onsite conditions. We plan for safely landing the zodiacs in different manners also with some swell, unmanned and with less risk for operators. And we prepare for the event that zodiacs are capsizing and we still can retrieve the equipment. We have done the first prelim sea trials of the zodiac equipment in Norway and will continue sea trials to further mature the concept. We plan for a gasoline powered winch system to lift equipment up the cliff, and this will be tested in Norway after Christmas. We plan to access the 25 ft cliff with professional means, and if needed prepare for climbing and bolting a short route to gain access. We refresh our climbing experience, and some team members will be certified climbers. In 2022 we will practice safe rope access training and evacuation down the cliff with instructor also including emergency evacuation with injured operator. We will have IRATA educated instructors training with us.

We also have an extended off-island team of 5 Norwegian professionals and experts from the maritime industry assisting us. These are former captains and chief engineers with huge experience within RIB SAR vessels, maritime risk assessment and safety training. Some of them have stayed several seasons at Bouvet, stayed anchored at Cape Fie, have passed Bouvet more than 60 times and have done zodiac landing at the same spot. With all these upcoming events and the knowledge in the extended team - be rest assured this will be a well planned and executed project.

CONWAY REEF 2021 • 3D2CR started operating from Conway Reef on 18 September at 03:41 UTC, and went QRT at 17:02 UTC on 25 September; as a result, according to Club Log's latest update, 45,752 QSOs have been added to the 33,837 contacts made in 2019. QSL direct via Club Log's OQRS. In case of missing QSOs, busted calls, etc., please contact Dom (3d2cr.2021@gmail.com). «The reason for this activity was full battlefield test for one man action using setup of 4 stations», Dom says. It is «possible to operate even 6 radios and make 100,000 QSOs from places like Bouvet by 1 man», he adds. See <https://www.facebook.com/rebeldxgroup/>.

CROZET 2022-2023 • After many months of efforts and negotiations, the TAAF (the body in charge of the administration of the French Southern and Antarctic Lands) has granted permission to Thierry, F6CUK to conduct a one-man operation from the Crozet Islands from mid-December 2022 to mid-March 2023. IARU NEWS: HF BAND PLAN REVIEW • The following was posted to the IARU Region 1 website by Tom Kamp, DF5JL (Chairman, IARU R1 HF Committee) on 25 September:

Over the past 18 months a proposal for an IARU HF Digital Mode reorganization has been undertaken by representatives of all three IARU Regions. The objectives were to review the data modes usage of the Amateur Radio HF spectrum and propose changes that:

- reduce inter-mode conflict between dissimilar operating modes; and
- facilitate the expansion of new technologies.

In conducting the review it was realized that it was necessary to update the manner in which the IARU creates its band plans. Accordingly, the IARU's band planning definition toolkit were redefined, and additional data mode definition characteristics has been added to help separate activities that are fundamentally incompatible within the data mode family. With the band planning process updated, the proposal then revised the band plans of all three IARU Regions, focusing on the data sub-bands and taking into consideration:

- popularity and capacity requirements; and
- existing band users and inter-mode compatibility assessments.

The team also took the opportunity to harmonize the band plans of all three IARU Regions to the greatest extent possible of course. The proposal is now being discussed in the relevant committees.

IARU NEWS: REGION 1 NEW EC • A new Executive Committee was elected at the IARU R1 Conference and Workshop on 24 October: Sylvain Azarian (F4GKR, President), Hani Raad (OD5TE, Vice-President), Mats Espling (SM6EAN, Secretary), Andreas Thiemann (HB9JOE, Treasurer), and EC members Ahmad AlHoli (9K2DB), Joerg Jaehrig (DJ3HW), Alessandro Carletti (IV3KKW), Lisa Leenders (PA2LS) and Oliver Tabakovski (Z32TO).

In the meantime, you can continue using the current ones. [TNX W8HC]

PZ5G • Originally planned for 15-18 October [425DXN 1560], the PZ5G IOTA DXpedition to Papegaaen Island (SA-092) had to be cut short as the high tide gave the operators serious and unexpected problems. «We were the first team to stay overnight», DJ4EL says, «and noticed that it is almost impossible to stay on Papegaaen while the water is high». Before evacuating the island, they made 441 QSOs between 01.43 UTC and 13.25 UTC on 16 October. The log has been uploaded to Club Log and the OQRS has been enabled.

QSL EL2DT • Bob, N2OO is the new QSL manager for Dickson, EL2DT. Depending on the date of your QSOs, two different Online QSL Request Systems should be used:

Also, the BoD has announced that the latest recipient of the Yasme Excellence Award is Steve Babcock, VE6WZ, «for his contribution to the art of lowband antennas and remote operating. Steve has made available to the amateur community countless hours of instructional videos, for free, on his YouTube channel and qrz.com page». Established in 2008, the Yasme Excellence Award is presented to individuals and groups who, through their own service, creativity, effort and dedication have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement, as all three are necessary for amateur radio to grow and prosper. The Yasme Excellence Award is in the form of a cash grant and an individually-engraved crystal globe.
