BOUVET 2023 • 3Y0J PROPAGATION POLL

Team 3Y0J has launched a Propagation Poll «to prepare for not only working the Big Guns, but to better understand when and if we succeed to work the Small Pistols»: <https://www.3y0j.no/latest-news>.

«By participating in this poll you intend to provide 3Y0J with information about your station setup to aid 3Y0J to understand what your station configuration looks like. Please give as accurate information as possible. When you work 3Y0J we will get info about what category you belong to. The information will only be used to display to the operators once you work them what category you belong to - so for them to get a better view of the propagation».

The categories have been intentionally limited to three:

1. Small Pistol max 100 W, vertical/dipole
2. Regular Station max 1 kW, 2-3 el yagi on 20-10m, wires on the low bands
3. Big Gun HP (>1 kW), high gain yagi on 20-10m, yagi on 80-30m

«In addition we will establish a baseline of DX stations - hopefully several thousand unique stations will participate in the survey. During the DXpedition we will not only know if we work a Small Pistol, Regular Station or Big Gun - but we can compare the various stations in our log with the baseline.

We are working on a script that automatically will do an online analysis of the QSO database, so to display an online parameter indicating if we reach out to the small pistols or not. Thus, everytime the 3Y0J operators log a QSO with a station which is part of the DX baseline (i.e. the participants in the survey) the respective Indicator (Small Pistol, Regular Station or Big Gun) will be updated. The Indicators will be compiled to a relative parameter which compares the actual stations worked with the DX baseline. This online parameter will give us an indication how well we manage to work the small pistols, and even at a certain continent. We then need to understand if this is due to the propagation or our operating practice».

BOUVET 2023 • 3Y0J FLEXIBLE BAND PLAN

The initial band plan for the much anticipated January 2023 DXpedition to Bouvet Island is now available on <https://www.3y0j.no/bandplan>. «We will work closely together with our pilots and if we see that something is not working, we will do adjustments», the team stated on 10 November. A few hints and tips from the team include:

- We will always keep lowest 10 kHz on regular bands and lowest 5 kHz on WARC bands clear to allow regular DX traffic. So you will never hear us calling CQ in that portion of the band.
- CW split will be limited to 15 kHz spectrum, and Phone split will be limited to 30 kHz spectrum. Thus operator will choose a frequency within the spectrum and limit the split to max 15 kHz and 30 kHz respectively.

- 160m will be CW only and 80m will be CW/SSB, so no FT8 on 160/80m.
- Special permit up to 1500W on CW/SSB.
- CW/SSB will have priority over digital modes.
- RTTY will be on 1-2 bands, 14125 and 21125 kHz.
- 60m frequencies have been updated, potentially 60m for last few days. There is no promise for 60m, but we want to do it if we can.

As for FT8 operation:

- FT8 will be F/H only, 4 stations aimed running 24/7 with 100W.
- We will NEVER transmit FT8 on regular FT8 frequencies. The 4 x FT8 stations can be controlled by one operator, or each FT8 station can be controlled individually by an operator running SSB/CW (SO2R) mode.
- FT8 will be on 40-10m running 100W, but focus on our 7 yagis 20-10m.
- We have chosen FT8/RTTY frequencies that gives us better in band separation, and also so to avoid the most public frequencies that might be occupied by others DXpeditions in F/H mode.
- We have agreed with Crozet that he runs FT8 on 10131 and Bouvet on 10140 kHz.

CROZET 2022-2023

- The *Marion Dufresne* is now scheduled to leave Reunion Island on 12 December, and to reach Crozet on 20 December.
- Thierry, F6CUK reports that, «following the signing of the agreement with the TAAF», he has been authorized to be QRV on the HF bands for three weeks only, between 20 December and 26 January. In addition, he will have to QRT for «at least 5 hours» each day, «to allow the French Polar Institute to take measurements».
- That being the case, Thierry intends to concentrate his activity on 2-3 bands - 20 and/or 17 metres, and 30 metres at night - in order to give an All Time New One to as many people as possible. «I have not chosen any frequencies either»,

he says, «this will be discussed with the scientists on site». At all events, he has already agreed with the Bouvet team that he will operate FT8 on 10131 kHz, and he is aware of the privileges granted to the General US licence class on 20m.

- No constraints will be put on satellite activity, and Thierry will be able to operate via QO-100 for the entire duration of his stay on the island. Departure from Crozet will be around 25 March.
- Thierry and his team are working to secure permission for a longer QRV period on the HF bands; he is in contact with the IPEV (the French Polar Institute Paul-Émile Victor), but to date he has no information about a possible extension.

- As for the callsign, Thierry has applied for a special callsign to mark the 60th anniversary of the first amateur radio activity from Crozet, conducted by Roger Baudelot, FB8WW, between December 1961 and February 1962. Thierry's callsign will be announced only a few hours before he starts operations. Bookmark <http://crozet2022.r-e-f.org/news.html> for updates.

SILENT KEYS

Ellen White, W1YL passed away on 6 November. She would have turned 96 next month. Licenced since 1946, she «devoted over 75 years of her life to ham radio, including more than 25 years on the headquarters staff for ARRL. She retired in 1978 as Deputy Communications Manager and became the editor of the column *How's DX?* for ARRL's membership journal, *QST*». An accomplished CW operator who loved contesting and DXing, she joined FOC (the First Class CW Operators' Club) in 1966, and in 2019 was granted the Al Slater G3FNB Memorial Award. In the same year she was inducted into the CQ Amateur Radio Hall of Fame as «the grand dame of DXing», and was awarded the Russian E.T. Krenkel Medal «for outstanding global contributions to amateur radio». Her husband Bob White, W1CW (ARRL DXCC Manager from 1952 until 1976) passed away twenty years ago, followed in 2004 by their son Jim White, K4OJ (founder and first president of the Florida Contest

Group).

On 8 November the Kuwait Amateur Radio Society reported the news of the passing of Ahmad Abdul-Jabbar Mansour Marafi, 9K2DZ. He was the «Last Voice from Kuwait», the amateur radio operator who risked his own life to handle health-and-welfare messages in and out of Kuwait during the Iraqi occupation (1990-1991). In 1992 he received the ARRL International Humanitarian Award, awarded to those who, by use of amateur radio skills, provide «extraordinary service for the benefit of others in times of crisis or disaster».
