Access to the main functions of www.425dxn.org is provided by the 425DXN App for Android. It is available on Google Play - free of charge, no ads. Enjoy!

CYOS ---> Because of some scheduling issues, three operators (K4UEE, K5YY and N2IEN) have dropped out of the team, which now includes Jay K4ZLE, Lou N2TU, Glenn WOGJ, Dan W4DKS, Murray WA4DAN, Lee WW2DX and two new members, namely Craig K9CT and John W2GD. The DXpedition to Sable Island is expected to take place on 20-30 March [425DXN 1659]. CYOS is also on Facebook: https://www.facebook.com/groups/955351178705747/.

FT8WW ---> Thierry has made nearly 39,000 QSOs so far. He has been authorized to continue until 3 March, then he will have to cease operations on the HF bands for one week. Finally, he expects to resume activity for a few more days. He is required to QRT ten days before the "Marion Dufresne" arrives to take him and others off the island. Depending on sea conditions, the ship is expected to stopover at Possession Island on or around 26 March.

QSL ET3SID --- Bob, N2OO has logs covering only the periods 13 February-2 June 2008, and 8-13 December 2011. QSL for these dates go to Bob Schenck, PO Box 345, Tuckerton NJ 08087, USA. Sid May, ET3SID passed away in 2012, and all other logs are missing.

VOYAGE TO THE PACIFIC ---> George, AA7JV and Mike, KN4EEI will be operating as /mm from power catamaran "Magnet" during a two-year journey across the Pacific. They will be mostly on 160-40m CW and on 30-10m FT8 and CW. Also, they plan to operate CW, FT8 and some SSB from a number of DXCC Entities. Their first stops will be at the Marquesas Islands (OC-027) approximately on 18-25 March, the Tuamotu Archipelago (OC-066, French Polynesia) approximately on 28 March-5 April, and the Society Islands (OC-046 and OC-067, French Polynesia) between 10 April and 10 July. In order to allow QSOs to be acceptable for DXCC credit, they will set up on various islands using the RIB landing craft and their Radio In a Box (RIB) stations.

In pioneering experiment sponsored by the Northern California DX Foundation, a remotely controlled station will be operated on 6 metres along the way from hundreds of very rare grid squares: "we intend to test out the Starlink connections en route using the call KH7Z/mm in the afternoons when the vessel is in calm waters". All KH7Z/mm QSOs will be uploaded automatically to LOTW after the completion of each grid.

The "Magnet" left Bahia Golfito, Costa Rica on 21 February. Grids will be posted to <u>https://www.grz.com/db/KH7Z</u> as they are activated.
