Access to the main functions of www.425dxn.org is provided by the 425DXN App for Android. It is available on Google Play - free of charge, no ads. Enjoy!

1A0C ---> The 1A0C team has been QRV since 26 July as planned [425DXN 1681]. Operations are taking place from the Sovereign Military Order of Malta's Magistral Villa on the Aventine Hill in Rome. QSL direct to EA5RM. Detailed QSLling policy, logsearch and OQRS can be found on http://www.1a0c.com/.

4W8X: LOCATION SETUP & LOW BAND ANTENNAS ---> Lagunaria DX Group's November 2023 DXpedition to Timor Leste [425DXN 1677] "will have two operating sites which are 500m apart. The main location, which we have also used for our 4W1A scouting trip in April, will serve all eleven bands from 160m thru 6m. The second location will serve seven bands from 40m thru 10m. The physical separation will enable us to provide two signals on the same band at the same time - one CW and one SSB. Please note that CW and SSB are our preferred modes, followed by RTTY. We'll give FT8 a chance, but we definitely prefer the man-made operating modes".
As for the low bands, 4W8X will have two 30m 4-Squares, two 40m 4-Squares, one 80m 4-Square and one Titanex V160 vertical with extensive radials for 160m. For receiving, they will have two Beverages (about 250m long) plus filtering/switching network to listen in four directions, independently on 160m and 80m: Europe (short path); North America (short path); Africa, same as North America (long path); South America, same as Europe (long path).

More updates highlighting different aspects of the DXpedition will be posted to http://timor-leste-dx.de/news/index.php on a weekly basis.

IDXC 2024 ---> Hotel reservations for the 75th International DX Convention, sponsored by the Southern California DX Club, will open on 31 July at 17 UTC: https://www.dxconvention.org/index.html. IDXC 2024 will be held at the Visalia Convention Center on 12-14 April.
