IOTA-60 DINNER IN FRIEDRICHSHAFEN --- > "To celebrate 60 years since the founding of the IOTA programme, an anniversary dinner will be organized on Friday, 28 June 2024, between 19:00 and 23:00, at the V2O Bio Restaurant in the Zeppelin Museum, Friedrichshafen. The event offers an opportunity for chasers and activators to share time together, chatting about topics of common interest, such as past and future expeditions, technology trends, and

goals". Tickets should be purchased in advance, by no later than 31 May (there will be no on-site availability to join the dinner and/or pay for it). See https://www.iota-world.org/management-news.html for more information and detailed instructions.

N5J: JARVIS ISLAND IOTA/POTA News ---> "Since the Dateline DX Association announced plans for activating Jarvis Island this summer, many have asked if we could arrange with IOTA and POTA program organizers to secure approval of our DXpedition.
Jarvis is one of the rarest of the IOTA counters, having been off the air for 34 years. It is needed by 82% of IOTA program participants.
Because of the requirements set by the permit of the USFWS, while the stations, antennas and power are all set up on Jarvis Island, the local operators must conduct the DXpedition from the MV 'Magnet' which will still be in the Jarvis Island National Wildlife Refuge, just offshore.
Both the IOTA and POTA programs have agreed to recognize QSOs made by the local operators but will not allow QSOs made by internet remote operators to count. Therefore QSOs made by AA7JV, HA7RY, N1DG, KO8SCA and KN4EEI will count for the awards (IOTA OC-081 and POTA K-0115).
Daily uploads by the N5J team to Club Log will identify the operators. Additionally, at the beginning of each operator shift the team will endeavor to post on the cluster the callsign of the operator so chasers have some real time notice. At this time, all phone operations are expected to be by the at island team as well, giving that mode 100% IOTA/POTA certainty.
In addition to the five operators mentioned above, there is an experienced team of 24 operators from 8 countries operating up to 6 stations around the clock, ensuring DXers around the globe have ample opportunity to add an ATNO or band fill to their DXCC totals".
