3D2XX (1988) ON LOTW ---> The computer disks have been lost, but W6SZN has the paper log. You can email your QSO data to Kip (kedwards[@]itol.com) and he will upload the requests to LoTW once a week or so. This was the first DXpedition to Rotuma. [TNX The Daily DX]

4W6A ---> The 4W6A team now has a Titanex V160E vertical antenna for use on 160 metres. They had previously planned to use an 18m Spiderbeam pole as the support for a 160m inverted-L. With the arrival of the Titanex, the 18m Spiderbeam pole will now be used for a full-size 80m quarter-wave folded monopole vertical instead. All the antennas will be located on the beach within a few metres of the ocean.
4W6A will be QRV from Atauro Island (OC-232), Timor-Leste on 16-26 September. There will be up to four station active on 160-10 metres CW, SSB and RTTY.
QSL via M0URX, direct or bureau (OQRS at www.m0urx.com). The entire log will be uploaded to LoTW as quickly as possible after the end of the operation or, if possible, also during the DXpedition. Further information can be found at www.4w6a.com [TNX 9M6DXX]

QSL VIA W8AEF ---> "Due to poor health, Dan Brown (NA7DB) has passed logs for all of the following over to W8AEF", The Daily DX reports:

9M0M	1-9 Mar 2001	XZ1ZV	30 Jan- 2 Feb 2000
NA7DB/HP4	4-13 Jan 2003	XZ5DB	31 Mar - 3 Apr 2002
XZ1L	30 Jan - 2 Feb 2000	ZK1AAG	6-17 Mar 1994
XZ1VS	31 Jan - 2 Feb, 2000	ZK1WTU	6-10 Mar 1994
XZ1YL	30 Jan- 2 Feb 2000	ZK1ZRD	6-17 Mar 1994

There are no cards left for some of those activities, so he will issue "just a note confirming the contact rather than a printed QSL. Logs will be loaded to LoTW when time permits".

XF4L (1989) ON LOTW ---> Some of the computerized logs have been lost, and only one third of the QSOs has been uploaded to LoTW. However "the paper logs remain intact and individual QSOs can be uploaded by contacting OH2BU". [TNX The Daily DX]
