3DA - 3DA0PW is the callsign issued to Phil, G3SWH and John, EA5ARC (G3OLU) for their 21-29 February activity from Swaziland [425DXN 1076]. They will operate CW only on 80-10 metres with two stations. They have a webpage at www.g3swh.org.uk/3da0pw.html. QSL via G3SWH and LoTW. [TNX G3SWH]

9A - The 9A prefix was issued to Croatia (previously YU2) twenty years ago. To celebrate this anniversary, several Croatian individual and club stations have been granted permission to add "20" to their prefixes (e.g. 9A0Z = 9A200Z, 9A1MM = 9A201MM, 9A2AA = 9A202AA, etc) from 1 January through 31 December 2012. Information on the relevant award can be found at www.hamradio.hr

CY0 - AA4VK and WA4DAN arrived in Halifax, Nova Scotia on 27 December in preparation for the Sable Island DXpedition [425DXN 1077]. Severe winds made it unsafe to fly on 28 December, and the "beach runway" on the island has been covered with water since the 29th. "Due to the uncertainty of when the runway will be suitable for landing", they reported on the 30th, "we decided to delay the DXpedition and return to the US".

FO - The VP6T team will be active as TX6T from Tahiti (OC-046) [425DXN 1076] both on their way to and returning from Pitcairn. The tentative dates are 15-16 January and 8-10 February. There might be a short operation as TX6T/p from Mangareva (OC-063) on 6-7 February, but that activity will depend on the early arrival of the return boat from Pitcairn. QSL via G3TXF. [TNX DX World]

FW - Laci, HA0NAR (www.ha0nar.hu) and other two operators will be active as FW0R from Wallis Island (OC-054) between 25 January and 23 February 2012. They will run two stations with amplifiers on 160-6 metres CW, SSB and RTTY, with a focus on 160, 80, 40 and 30m. On 5-10 February they will operate as TW0F from Futuna Island - same DXCC Entity but a different (and rarer) IOTA group, OC-118. QSL for both callsigns via HA0NAR.

HK0 - On 26 December four HK0NA team members (HK1N, HK1T, HK6F and HK1MW) departed from the Colombian Navy Base Bahia Malaga, destination Malpelo Island. The advanced team will set up two operating sites, 11 stations, 18 antennas and the wireless network in order to allow the main group to begin radio operations immediately upon their arrival on 21 January. Bookmark http://hk0na.com for updates.

KH3 - Susan, W7KFI has to postpone her operation from Johnston Atoll [425DXN 1071] for 4-6 weeks. The US Fish & Wildlife Service requires the she "pulls her boat out of the water and has the hull scraped, then repainted. The shipyard who would do this work cannot get Susan an appointment until approx four weeks from now", her QSL manager (KH6CG) reported on 24 December, "so shove off

date will be beginning February at earliest". [TNX DX World]

PJ2 - Ron, N6EE and Chet, W6XK will be active as PJ2N from Curacao (SA-099) during the ARRL RTTY Round-Up (7-8 January). QSL via LoTW or direct to NN6NN. They also plan to operate digital modes as PJ2/N6EE and PJ2/W6XK before and after the contest. [TNX DX World]

The country list to be used for the Diamond DXCC Challenge is based upon the list of 231 places shown in 1937. The idea is to work nowadays entities (not only traditional DXCC entities, but also cities, IOTA groups, and various sub-political entities inside DXCC entities) that represent the places listed 75 years ago. Complete details can be found on the dedicated web pages at www.arrl.org/diamond-dxcc

If you had credit for 5N6/YL2SW rejected in the past, send a note to bmoore[@]arrl.org to have your record updated. You can see the results when the change has been done to your record by checking your LoTW account or, the DXCC daily numbers. [TNX NC1L]

HS0AC ---> The Northern California DX Foundation announced a "Christmas gift" of $500 to help rebuild and re-equip the Radio Amateur Society of Thailand's HS0AC Club station that was destroyed by recent flooding [425DXN 1076].
The three towers and multi-band yagis were not harmed, the clubhouse itself can be refurbished and used again, and the HS0AC computer logs are safe. However, there are no surviving radios: 14 rigs were lost along with

amplifiers and all other devices (read the "HS0AC Horror Story" at www.qsl.net/rast/)
HS0AC is appealing to the world to help re-build. The goal is to get at least one complete station replaced as soon as possible, but replacement will expand as funding is available. This station is open for operation by any licensed amateur, from anywhere, and for decades has represented Thailand in contests and as a first HS DX contact. Please help Thailand hams by donating any amount via PayPal (donate[@]rast.or.th). All donations will go entirely to rebuilding the station.
