KP1 - On 20 December the K1N team reported that "progress in preparations for a late January landing on Navassa is coming along very well". A container is being shipped from Atlanta to the staging point in the Caribbean. The exact dates for the expedition will be known at the end of December.

Bob, N2OO is the chief pilot and has organized a worldwide team to collect reports and suggestions from the various target areas (click on the 'Our Team' tab on the DXpedition's website to identify your pilot and his contact information). Feedback will be
"prioritized, filtered and/or condensed to pass along to the team at least daily". Follow K1N on Twitter (@navassa2015) and check out their Facebook page (www.facebook.com/2015Navassa).

The cost of the K1N operation is very high and the time to raise the money needed to fully fund the project is very short. The first half of the nearly $200,000 for the helicopter transportation has been paid. By the end of this year another $95-97,000 must be paid to the U.S. Fish & Wildlife Service for the transportation of the required law enforcement team. The 15 operators have contributed $157,500 toward the K1N operation, roughly half of what it will cost. DX Foundations, Radio Clubs, and individuals have been "exceptionally generous" in their financial support, but the K1N team still needs to "raise a significant amount of additional money" before the operation commences in late January. Click on the 'Donate' tab on www.navassadx.com for detailed information on how to donate to the K1N Navassa DXpedition.
