2020 IOTA HONOUR ROLL & ANNUAL LISTING ---> The last date for mailing score updates to checkpoints for inclusion in the 2020 Honour Roll and Annual Listing is 31 January (it is advisable not to wait until the very last moment, though). If postmarked after that date, they will be processed in the normal way, but the scores will be held over to the following year's list-

ing. Participants who have not updated since the 2015 annual listings and wish to remain listed should make a submission before 31 January. Furthermore, those who have not logged into their record for more than two years, will need to revalidate their registration through info[[@](mailto:info@iota-world.org)]iota-world.org. Do not leave it to the last moment as you may run out of time.

VP8PJ ---> In their Press Release #10 (20 January, <https://sorkney.com/>) the South Orkney Islands DXpedition team reported that the final approval has been received ("landing and camping at South Orkney requires permission from several government agencies, and this multi step process takes months to complete"), the sea container arrived in Punta Arenas (Chile) on 13 January, and new companies have joined the corporate sponsors team.

The operating team "will follow a rotating 4 hours on and 8 hours off schedule", and "each team member is assigned tasks while on the island. Major activities are prioritized and staffed accordingly. The Braveheart crew will help with the heavy lifting and other setup activities. After landing, designated teams will first erect the WeatherPort shelters, install the power grid, and furnish the sleeping and operating shelters. Meanwhile the antenna teams will install the HF antennas, followed by the low band antennas. Weather permitting, setup is expected to take approximately two days".

As for fundraising, 52 clubs/foundations, over 500 individuals and 60 Premier Sponsors have supported the project so far. "We appreciate the support from the worldwide DX and amateur radio community", the team says, and "we continue to make progress towards our goal of the radio team paying 50% of the project cost with sponsorships paying the remainder". One more press release is expected before the team leaves home in early February. [TNX K5GS]
