CONWAY REEF 2021 ---> 3D2CR started operating from Conway Reef on 18 September at 03:41 UTC, and went QRT at 17:02 UTC on 25 September; as a result, according to Club Log's latest update, 34,579 QSOs have been added to the 33,830 contacts made in 2019. QSL direct via Club Log's OQRS. In case of missing QSOs, busted calls, etc., please contact Dom (3d2cr.2021@gmail.com). "The reason for this activity was full battlefield test for one man action using setup of 4 stations", Dom says. It is "possible to operate even 6 radios and make 100,000 QSOs from places like Bouvet by 1 man", he adds. See <https://www.facebook.com/rebeldxgroup/>.

IARU NEWS: HF BAND PLAN REVIEW --- > The following was posted to the IARU R1 website by Tom Kamp, DF5JL (Chairman, IARU Region 1 HF Committee) on 25

September:

"Over the past 18 month a proposal for an IARU HF Digital Mode reorganization has been undertaken by representatives of all three IARU Regions. The objectives were to review the data modes usage of the Amateur Radio HF spectrum and propose changes that:

- * reduce inter-mode conflict between dissimilar operating modes; and
- * facilitate the expansion of new technologies.

In conducting the review it was realized that it was necessary to update the manner in which the IARU creates its band plans. Accordingly, the IARU's band planning definition toolkit were redefined, and additional data mode definition characteristics has been added to help separate activities that are fundamentally incompatible within the data mode family.

With the band planning process updated, the proposal then revised the band plans of all three IARU Regions, focusing on the data sub-bands and taking into consideration:

- * popularity and capacity requirements; and
- * existing band users and inter-mode compatibility assessments.

The team also took the opportunity to harmonize the band plans of all three IARU Regions to the greatest extent possible of course.

The proposal is now being discussed in the relevant committees".

VP0: NEW PREFIX ALLOCATION ---> The Government of South Georgia & the South Sandwich Islands has announced the opening of public consultation on a draft policy for amateur radio licensing. The Government's proposed policy includes the issuing of amateur radio callsigns with the prefix VP0, followed by an alphabetic character of either S or G. The consultation process will end at 15 UTC on 18 October. The draft policy and the online feedback form are on <https://www.gov.gs/amateur-radio-licences-policy-consultation/>. The Government requests that only those who have a genuine interest in these DXCC Entities complete the feedback form. [TNX G3WOS/VP8DBL/VP8WOS, see also <https://www.openfalklands.com/>]

WSJT-X 2.5.0 ---> The WSJT Development Group has announced the General Availability release of WSJT-X Version 2.5.0: "WSJT-X in this release is nearly identical to that in WSJT-X 2.4.0. The Q65 decoder has been enhanced to measure and compensate for linear frequency drift in Q65 signals. In addition, the Windows installation package now includes version 3.0 of application MAP65 which has Q65 support to match and improve on its existing JT65 capabilities". See <https://physics.princeton.edu/pulsar/kljt/wsjsx.html> for the links to the installation packages for Windows, Linux and Macintosh.

+ SILENT KEY + Dr. Thomas A. Clark, K3IO passed away on 28 September aged 82. A long time pioneer involved with amateur satellite development, he was Director Emeritus and President Emeritus of AMSAT. He was a leader in the development of the AX.25 packet radio network in the 1980s, and his pioneering work on Software Defined Radio led to the development of the Software Defined Transponder (SDX) for satellite work. In 2001 he was inducted into the CQ Hall of Fame, and in 2016 the ARRL honoured him with its President's Award to recognize his 60 years of advancing amateur radio technology.
