SOLARHAM ---> Created and maintained by Kevin Gibeau, VE3EN, SolarHam.com was launched on 15 March 2006 with the purpose of providing real time Space Weather news and data from various sources, all in one location for easy navigation. Now this popular resource is taking "an extended break", as "the current world events and life in general has made me want to refocus my attention on what matters most, my daughter, my family and my health", Kevin says. "While I do not know when I will be returning to day to day operations", he adds, "I have put some elements of the website that do not require any work on my part back online".
