- 8Q7 - Until the 10th of May Gerhard (DL3NBL) and Hans (DL8NBE) will be active respectively as 8Q7BL and 8Q7BE from Thuragiri Isl. (AS-013). QSL via home-calls.

CONWAY REEF -> OH1RY, team leader of the Conway Reef DXpedition, reports that activity, from 25 March to 3 April, scored 30.000 QSOs of which 15-20% with European stations (but in 15 and 10 mtrs almost only K and JA stations) Operation was two days less than initially planned due to severe landing accidents caused by very high swell, which turned into 10 meter high breakers when the waves hit the coral reef. The landing operation was done in several stages, several trips had to be made. The first landing trip took some antennas ashore, the second one became a disaster when radios, computers, the outboard motor and personal belongings were lost not to mention seriously endangering the lives of the operators. The computers were lost - which is why there are few statistics to give out at this time. Paper logs were used, in fact all available slips of paper which could be found were filled with QSO-data. Supporting: Needless to say the operation turned out to be more of a life rescue operation than a DXpedition. Much material loss also occurred. Now DX folks, if you feel that you can support the group, please send your support as a money transfer to the account specifically set up for this purpose. Bank: "OKO Bank Finland", Account number: 531935-42044, account name: "Conway 1995". Many did offer their support before the expedition. Of this the group is very grateful. The group hereby announces that in 1996 OH1RY+Co will find their way to Canton Island T31. We remind that QSL managers for the Conway expedition are SM7PKK (only for CW contacts with 3D2CU) Mats Persson, Zenitgatan 24 #5, S-21214 Malmo, Sweden) and G4WFZ (only for SSB contacts with 3D2CT) Philip Marsh, Orcheston road 28, Charminster, Bournemouth BH8 8SR, Dorset, England.

SCARBOROUGH REEF -> OH0XX, that together with BZ1HAM, BZ1OK, KJ4VH, OH2BH and VR2EW has been one of the operators of last activity from Scarborough Reef (BS7H), reports that during the operations they scored about 12,000 QSOs, of which CW-QSOs are 3000-4000 (a thousand were made by the Chinese straight keyers). Remember that the QSL manager is JA1BK and that next activity from Scarborough Reef is planned for 1996, by BYs.

WF5E QSL SERVICE -> Following what previously published and answering to many requests here are some details for the WF5E QSL service. From August 1994 after 13 years and about 1,000,000 of cards, the "DX QSL Service" of Dick, N7RO, ceased to operate and is now in the hands of Les Bannon, WF5E, that use the same way of Dick, sending the cards directly to the DX station or his manager, using the informations of DX bulletins and other publications. When he receive the cards back from the DX stations he then send them thru the bureau. Cards must be alphabetically ordered and no older than 12 months. The cost is 1 US\$ or 2 IRC for 6 cards. The address is: WF5E-DX QSL SERVICE, 3400 Bedford, Midland, TX 79703, USA.
