QSL received -> CY9C, IR1ANT, P4/WA2NHA, VP2VE, VQ9TP, XX9TYD, 3V8BB, 4J0/IK2NHX, 5B4/DL1DSN, 5H1CK/A (AF-075), 5H3CK (AF-054), 5H3CK/A (AF-074), 5R8EI, 5R8EJ, 8A4EI (OC-204).

NEW IOTA REFERENCES NUMBERS ISSUED

The following new IOTA References Numbers have been issued for June operations:

NA-205 VO2 NEWFOUNDLAND PROVINCE (LABRADOR) CENTRE group (Canadian Islands, lettera "c"), issued for the NU2L/VO2 activity from Annio-waktook Island.

OC-207 DU1 CAGAYAN IS (Philippines, lettera "b"), issued for the 4H1TR activity from Tubbataha Reef.

The IOTA Commitee is still waiting for the DS0DX/2 documentation, from Pae-ngyong group, which is stil without reference number.

V IOTA Convention -> The inclusion, in the programme of the HF-DX & IOTA Convention (Bologna, 13-15 October 1995) of a "preliminary check of IOTA QSLs" seems to have given rise to a misunderstanding which in its turn might raise partially unjustified expectations. It is therefore necessary to state that there will be no proper "IOTA desk" for the checking and crediting of confirmed contacts. More simply, it will be a guidance service for those who are uncertain about their participation in the Programme, about the validity of possible "doubtful"cards, about the procedures to follow and so on. The actual checking and crediting of QSLs are much more engaging, they demands a lot of time and often require resort to supporting reference material (atlases, maps etc.) which are not available at a Convention: therefore the actual checking process shall as always take place at the various checkpoints, as specified in the IOTA rules.
