The following transmit frequencies will be used by BS7H: 1826.5, 3505, 7005, 10105, 14024, 18073, 21024, 24895, 28024 and 50110 kHz (CW); 1826.5, 3790 (3750 secondary), 7065, 14195, 18115, 21295, 24935, 28485 and 50110 kHz (SSB); 14083 and 21083 kHz (RTTY). The primary goal of this operation is to give as many DXers as possible the opportunity to work an all-time new one. ********** GOOD TO KNOW ... **********

****

4L INFORMATION ---> Information on amateur radio in Georgia is available from 4L2M, Mamuka Kordzakhia, President of the National Association Radioamateurs of Georgia, P.O. Box 601511, Hamburg 22215, Germany.

9M6TPR & 9M6TCR ---> Paul, K1XM/9M6TPR and Charlotte, KQ1F/9M6TCR [425DXN 306] logged 612 QSOs from Keningau, Borneo (OC-088), 6324 QSOs from Layang Layang, Spartly Islands (AS-051) and 625 QSOs from Sipadan Island (OC-133). Paul and Charlotte decided that their goal would be to give Spartlt to as many people as possible, and gave that priority: 20 metres was the best band for them so they operated there when it was open. Paul did most of the CW operation and Charlotte did most of the SSB operation. Continent statistics (they do not include dupes) are as follows (CW/SSB): North America 1004/0, South America 18/0, Europe 2468/5, Asia 1963/454, Africa 13/1, Oceania 77/36. All QSLs are via KQ1F, either direct or through the bureau.

EY4AA/6 ---> Nodir Tursoon-Zadeh, EY8MM (Vice president of the Tajik Amateur Radio League) reports that there is no license issued for the station EY4AA/6 which was active on 80 metres. Nodir thinks that operations were taking place from Krasnodar, Russia (UA6A).
