The Five Star DXers Association, of 9M0C (February 1998) and D68C (February 2001) fame, has announced "Project Star Reach", a large-scale DXpedition to Rodrigues Island (AF-017).

A multinational team (so far including DL7AKC, EI5DI, G0OPB, G3NUG, G3BJ, G3IZD, G3NHL, G3RAU, G3SED, G3WGV, G3WKL, G3XTT, G4FRW/W2R, G4JKS, G4KIU, G4TSH, G4XVE, G4YOX, JA1RJU, JH4RHF, KF7E, M0DXR, M0GDM, N7CQQ, NK7C and W3EF) will operate as 3B9C for over three weeks, including four weekends. The first members of the team will arrive on 15 March, and expect to spend the first two to three days installing antennas and equipment. Station breakdown will start on 12 April, though operations may continue for a further day or two after that.

3B9C will have up to fifteen high-power HF stations active simultaneously when band conditions allow. Activities will encompass SSB, CW, RTTY, PSK31 and, as appropriate, FM. There will also be satellite activity and possible EME. Large monoband antennas will be used on all bands, as the two main objectives are to provide the possibility for every amateur radio station in the world - even those running QRP or a very simple antenna - to make at least one contact with 3B9C; and to enable top DXers to put 3B9C in their log on as many bands and modes as possible.

Project Star Reach is seeking contributions from sponsors to help defray the very significant logistics costs of this DXpedition. For further information please visit [http://www.fsdxa.com/3b9c](http://www.fsdxa.com/3b9c) [TNX G3XTT, g3xtt@lineone.net]
