DRCG LONG DISTANCE CONTEST ● The final run of the ANARTS WW RTTY Contest took place in June 2009. The DL-DX RTTY Contest Group (DRCG) has decided to continue this popular contest with some rule changes and a new name: DRCG Long Distance Contest (DLDC). ETHICS AND OPERATING PROCEDURES FOR THE RADIO AMATEUR ● Over the past decades the behaviour of the radio amateurs on the bands has significantly deteriorated. In 2008 John Devoldere (ON4UN) and Marc Demeuleneere (ON4WW) wrote a comprehensive document entitled "Ethics and Operating Procedures for the Radio Amateur", document aiming to become a universal guide for newcomers and old-timers alike on the subject of operating ethics and operating procedures. In 2008 this document was accepted by the IARU AC (Administrative Council, the highest body of the IARU) as representing the point of view of the IARU on the subject. Two years later the manual has been translated in more than 25 languages, with more coming. To achieve easier access to all of the existing versions, the authors have set up a website (www.ham-operating-ethics.org). You can download PDF files directly from the site or via the National Societies' websites in the different countries.

MACQUARIE ● Dennis, ZL4DB will not be able to operate from Macquarie Island [425DXN 993]. He "is now at Macca Base on the island", the Daily DX reports, "and says the ham gear thought to be there is gone. All that remains is a 2M rig. There are insulators going through the wall but no wires attached".

MALYJ VYSOTSKIJ ● On 27 May an agreement on the lease of the Russian part of the Saimaa Canal zone to Finland was signed in Lappeenranta, Finland by the Prime Ministers of the Republic of Finland and the Russian Federation. The new 50 year agreement supersedes the initial lease of 1963 which is due to expire in 2013. The new lease no longer includes Malyj Vysotskij Island, the present R1MV DXCC entity. The coming into effect of the agreement is subject to ratification by the parliament of Finland and the Russian duma later this year. [TNX OH2BN]

NCDXF ● The newly designed Northern California DX Foundation website is now on line (<http://ncdxf.org>). "We hope this new interactive website will tell our story, provide resources for DXers, and enable everyone to follow past and future DXpeditions that NCDXF has sponsored", Glenn Johnson, W0GJ says. "Visitors to the website will find it both informative and pleasant to explore".

Equipment will include a full set of Elecraft K3 transceivers and a set of Acom 1010 amplifiers ("which will help overcome some of the low-band difficulties and help keep our signals above the noise"). As for the antenna field, they will have a complete set of verticals from 40m through 10m supplied by DX Engineering complemented by two BigIR vertical antennas (which "will allow us maximum flexibility with propagation, and two stations active within the same band whenever possible"); on 80 and 160m they will have the Battle Creek Special, one DX Engineering's 4-square receive antenna system plus vertical wires supported by 60-foot and 85-foot Spiderbeam fiberglass masts ("this allows simultaneous CW and SSB operation on 80 and gives us redundancy on 160"). Donations are gratefully accepted (details at www.vp8o.com). [TNX N1DG]

Complete information can be found at <http://wff44.com/en/contest/> [TNX RW3GW]

WSJT8 • This piece of software is an experimental version of the familiar weak-signal communication program WSJT. It offers new protocols or "modes" optimized for meteor scatter, ionospheric scatter,

EME, microwaves, and QRP at HF. Like the modes in previous versions of WSJT, the new ones are intended for making minimal QSOs, not for rag-chewing. WSJT8 modes are not compatible with those in WSJT7. To use the new modes, transmitting and receiving stations must both use WSJT8. A beta release of WSJT8 is now available at www.physics.princeton.edu/pulsar/K1JT/
